2017 Collection

siemens-home.bsh-group.com/uk | siemens-home.bsh-group.com/ie

Siemens. The future moving in.

Uncompromising design, innovation and technology.

Introducing our freestanding range of sensor-controlled appliances with iSensoric technology. Fully coordinated, they are good looking on their own and fabulous together. Siemens appliances combine innovative and intelligent technology with energy efficiency and sleek, stylish design.

In this brochure, discover iSensoric technology including our precision dosing washing machine, which produces outstanding wash results whilst saving litres of water a year, and our most energy efficient tumble dryer. We also present our latest range of award-winning dishwashers featuring the world's first Zeolith® drying system; a technological innovation that sets new standards for performance and energy efficiency. Take a look at our stylish fridge freezers, fridges and freezers that never have to be defrosted, all combining to make your life easier, for your home.

Stunning designs that your friends will envy, clean lines that coordinate with the rest of your living space and high quality materials come as standard with all Siemens appliances. Offering you the perfect balance between modern design and innovative technology.

New

Look out for this icon to indicate new products and features for 2017.

Welcome home.

Siemens presents: iSensoric.

Sensor-controlled performance for a new sense of freedom.

As well as perfect washing results, clean dishes and long-lasting freshness for your food, iSensoric delivers maximum efficiency to give you more time and leave your daily routine behind.

Enrich your life with iSensoric technology: fully focus on what's important to you, dive into a new adventure every day and discover each chance that life has to offer.

iSensoric is an innovative network of sensors built into each appliance. They interact with intelligent software to manage your home appliances automatically. And because it's automatic, you don't have to think about anything else – except for what to do with your day.

All of the appliances equipped with iSensoric are less dependent on your interaction in many ways. The revolutionary technology makes each household task even more convenient and provides you with the best possible results at the same time.

Intelligent sensors within our washing machines and dishwashers measure the cloudiness of the water to automatically adjust the programme.

Speed. Energy-efficency. **Style.**

Your home, all in one app.

As innovation moves on, new possibilities arise. Thanks to Wi-Fi-enabled Siemens home appliances with Home Connect functionality, they make their way into your home and enrich your everyday life.

One interface for all appliances
Ovens & Coffee Centre

- Recipe World offers you a wide range of delicious recipes – choose your favourite and send the ideal settings directly to the oven.
- Operate the oven intuitively from wherever you are, for instance to preheat it while you are on your way home.
- The coffeeWorld in your Home Connect App provides an additional variety of delicious coffee specialties from around the world.
- The coffeePlaylist enables you to transfer the beverage wishes of all your guests remotely to the appliance at once – the coffee centre will then prepare one after another.

Models shown: **HN678GES6B** single oven, **CT636LES6** coffee centre, **BI630CNS1B** warming drawer

Hobs & Hoods

- Remote monitoring gives you an overview of your appliance's current status – from wherever you are.
- Intuitively change and select settings on your appliances via the Home Connect App.
- Push notifications inform you about your appliances such as when the filters need replacing.
- Access 256 colours to set the ambient lighting of selected hoods with emotionLight Pro.

Models shown: **LC97FVW60B** hood, **EX975KXW1E** hob (launched September 2017)

Dishwashers

- Remote controlling lets you select options, and start programmes intuitively wherever you are.
- With the Tab Counter, you get Push Notifications whenever the supply of dishwasher tabs needs to be refilled.

Model shown: **SN678D06TG** built-in dishwasher

Fridge Freezers

- Cameras in the fridge let you check the contents of your fridge from wherever you are, whenever you want.
- Remote controlling allows you to intuitively select and activate the ideal setting for your refrigerator.

Model shown: **KG36NHI32** fridge freezer

Washing Machines & Washer Dryers

- Remote monitoring provides you with an easy overview of your appliance's current status – from wherever you are.
- Push notifications inform you when the cycle is finished and, for our i-Dos model, whenever the fill status of detergent or fabric softener is getting low.

Models shown: **WMH4Y890GB** washing machine **WT4HY790GB** washer dryer

Is an appliance Wi-Fi ready?
To see which of our appliances come with Wi-Fi-enabled Home Connect, look out for the **Wi-Fi ready** icon on each appliance page.

WiFi ready

Discover even more about Home Connect.

Home Connect is a service offered by Home Connect GmbH. To use Home Connect, you have to create a user account and register with Home Connect GmbH.

Washing machines

Smarter thinking, smarter clothes.

Sleek, streamlined, and stylish, Siemens washing machines not only look great in your home, they perform too.

With state-of-the-art technology they are extremely energy efficient, easy to use, and most importantly designed to save you time and money. The Siemens range has been developed to make laundry easier and less of a chore.

Model shown: **WMH4Y890GB** i-Dos washing machine
Siemens presents: iSensoric

The unique quality that distinguishes the iSensoric technology is the connection of all the sensors.

1 i-Dos
Automatic dosage of the detergent. The i-Dos system is the combination of all the sensors. It automatically determines the exact amount of liquid detergent needed for each laundry cycle, based on weight of the load and what programme is used. The built-in drawer conveniently holds enough liquid detergent for around 20 washes, meaning you don't have to measure and fill the container for every wash. Plus as the correct amount of detergent is used every time, clothes will receive the perfect wash.

2 Textile Guard
Working with Nikwax, Textile Guard applies a waterproof treatment to breathable fabrics, prolonging the life of high quality functional clothing like winter jackets, fleeces and ski suits. Simply add the Nikwax treatment to your detergent drawer and select the Textile Guard option.

3 autoStain removal system
The autoStain removal system removes the 16 most common stains. Each stain is different, whether it comes to tomatoes, grass or red wine! The autoStain system knows exactly how to handle these stains. The temperature sensor selects the right temperature for the molecular properties of the stain. The flow sensor and load sensor plus choose the right amount of water in order to remove the stain.

4 Outdoor Wear
Since outdoor wear is mostly made of synthetic fibre, the dirt stays on the surface and needs to be rinsed with lots of water. With iSensoric, the exact amount of water in relation to the load volume is monitored by the flow sensor and the load sensor plus, to only ever use the optimum amount. As most outdoor wear has welded seams, the temperature sensor also controls the heat level to avoid damage to the seam.

5 varioPerfect
With varioPerfect you can determine the washing process depending on what is important to you; saving time or energy, without compromising on quality or cleanliness.

6 Auto Programmes
With Auto programmes the amount of water, energy and the amount of detergent needed is tailored to the amount of laundry in the machine. The flow sensor accurately measures how much water is needed, while the load sensor plus measures how much and what kind of laundry is put into the drum. Each wash cycle will detect the necessary requirements, using the minimum consumption of water, energy and detergent, but always with a perfect washing result. Auto programmes – powered by iSensoric.

7 sensoFresh
Get rid of odours such as cigarette smoke or kitchen smells – the sensoFresh programme provides odour elimination in a short time, even for sensitive and non-washable textiles. Active oxygen neutralises smells in just 30 to 45 minutes, depending on the intensity of the odour.

The power of interacting sensors.

All designed to **coordinate beautifully** with your Siemens appliances

Keep good memories, not bad smells.

Experience effective odour removal thanks to the sensoFresh programme.

sensoFresh uses the power of active oxygen

Discover the power of active oxygen in the revolutionary sensoFresh system. Powered by iSensoric.

Beautiful memories are too precious to be compromised by bad smells. You can't prevent your clothes from picking up odours when you're enjoying the moment – but that's no problem for sensoFresh. Thanks to the use of active oxygen, you can now remove odours quickly in your washing machine, without using water or detergent. Even for sensitive clothes or textiles that aren't meant to be washed. Finally, you're able to enjoy your life to the fullest – and your clothes will be refreshed for the following day.

The use of active oxygen marks the latest revolution in laundry care. The iQ500 washing machine with the sensoFresh system provides the ideal solution to refresh almost any type of textile without using water or detergent. Whether it comes to odours or germs – active oxygen removes them easily and thoroughly, providing pleasantly fresh clothes and outstanding hygiene. Prepare yourself for a new level of convenience.

Effective odour removal with active oxygen: The sensoFresh programme.
Get rid of odours such as kitchen smells without the use of water or detergent – the sensoFresh Programme provides odour elimination quickly, even for sensitive and non-washable textiles. Active oxygen neutralises smells in just 30 to 45 minutes, depending on the intensity of the odour.
Meets your highest hygiene standards: The drum clean programme.
The programme for cleaning the washing machine's drum prevents the formation of odours inside the drum. Active oxygen prevents the accumulation of odour-causing bacteria effectively and ensures a hygienically clean machine.

Hygienically clean laundry even at low temperatures: The hygiene programme.
The hygiene programme is particularly suitable for delicate textiles that cannot be washed in a high-temperature wash programme. Thanks to the use of active oxygen, the laundry is hygienically cleaned even at low temperatures down to 40°C.

Experience more.
There is much more to discover about the sensoFresh system, its benefits and technology. Everything you need to know, you'll find at www.siemens-home.bsh-group.com/uk/sensofresh

Just add laundry!

The i-Dos system automatically determines how much detergent is needed for each of your wash loads, based on the weight of the laundry and programme used.

Saving you time, the i-Dos washing machine allows you to simply place your clothes in the drum, select your desired programme and relax. The i-Dos system uses a combination of all the sensors to automatically determine the exact amount of liquid detergent needed for each of your laundry cycles, depending on the weight of the load and what programme is used. With the built-in drawer conveniently holding enough liquid detergent for around 20 washes, not only does this mean you don't have to measure and fill the container for every wash, but as the correct amount of liquid detergent is used every time, your clothes will receive the perfect wash whilst saving you precious time and around 11 litres in detergent per year.* The result, hassle-free laundry and perfectly clean clothes!

1. Set rotary selector to an "Automatic" programme

2. Load your washing and close the door

3. Press start and sit back

*Oko-Institute, Germany, 2007

Tough on stains, gentle on your washing.

Removing tough stains without the need for specialist products or pre-washing.

Keeping your life uncluttered, our specially designed autoStain removal system (ASR) takes the effort out of cleaning tough stains. Simply load your clothes in the machine, choose a wash programme, select one of the 16 stain treatments and let ASR do the rest. This saves you time and removes the need for specialist products or pre-washing.

stain removal system

It happens to the best of us, a stain on your favourite dress or best shirt is part of life. However, we have a solution that is going to save you time and effort when it comes to removing stubborn stains, autoStain system (ASR available on models WMH4Y890GB, WMH6Y790GB and WMH4Y790GB. 4 stain options available on models WM16W590GB and WM14W590GB). So next time you need to remove last night's wine from your shirt sleeve or a lipstick smudge on your favourite dress, look no further than your Siemens washing machine.

Whether it is red wine or coffee, dirt or grass, blood or even cosmetics, our autoStain removal system (ASR), automatically optimises the wash settings to remove individual stains from your laundry.

The ASR system eradicates the need to pre-wash stained clothes and the use of special detergents, tackling up to 16 different types of stain. The ASR system tailors the wash according to the nature of the stain, creating the perfect balance between the mechanical drum action, water level, wash time and temperature.

Saving you time and money on buying specialist products, those unforeseen accidents need not ruin your clothes anymore.

Stain selection is made easy with the large clearText TFT Display screen. *Illustration only. Actual washing machine display may vary.*

Not built to meet expectations.
But to exceed them.

Siemens avantgarde:
Discover our most premium laundry care range.

The new laundry care appliances that keep up with your lifestyle. Discover the cutting-edge appearance and enjoy laundry care appliances that are exactly as expressive and individual as you are. Siemens avantgarde adds a touch of brilliance to your home – even for everyday tasks like washing and drying laundry. Enjoy outstanding design and exceptional convenience thanks to the inclined ergonomic control panel, intuitive multiTouch LED display, and an overall outstanding appearance.

Get in touch with every feature: multiTouch LED display.
The multiTouch LED display allows you to operate every feature of the washing machine and dryer intuitively, without having to press any buttons. What's more, you can receive precise visual and acoustic feedback with different LEDs and sounds.

multiTouch

Drying without obstacles: selfCleaning condenser.
selfCleaning condenser prevents the dryer from becoming clogged with lint or fluff. The system cleans out the affected areas several times during the drying programme to keep the dryer's performance high and its energy consumption low.

selfCleaning condenser

Your personal washing and drying programme: myFavourite.
With the memory function myFavourite, you can start your favourite programme with one touch on the multiTouch LED display. myFavourite remembers your desired combination of programme and possible options so you don't have to set it up again for the next wash or drying cycle. Experience more.

myFavourite

Just add laundry: i-Dos.
Saving you time, the i-Dos system automatically determines the exact amount of liquid detergent needed for each of your laundry cycles, depending on the weight of the load and what programme is used - for perfectly clean laundry with minimal use of resources.

i-Dos

Do the laundry at your own speed: myTime.
Whether you're in a rush or have plenty of time, you can choose how long your washing or drying takes with myTime. Choose to run the programme from between 20 to 60 minutes, you decide. Now you can fit the laundry into your schedule without compromise.

myTime

selfCleaning condenser | 5 Year Warranty

Siemens washing machines help take the hassle out of washing.

Our machines take full advantage of the latest technology and innovation, designed to make laundry less of a chore.

Introducing ground-breaking innovation in laundry care; iSensoric technology

iSensoric technology is an innovation that gives your Siemens washing machine a unique ability: thinking. It stands for automatically measuring, detecting, calculating and controlling every step of the washing process, so you can get on with your day.

5 Year Warranty

For complete peace of mind, all Siemens appliances come with a free 2 year warranty as standard. A free 5 year warranty is available on selected freestanding models, where indicated, which covers parts, labour and call-out charges.

A+++ Energy

Our entire range boast A+++ for energy
Siemens washing machines are extremely energy efficient, using as little as 0.13kWh/kg, they are rated at the very top of the European Energy Efficiency Rating system. All Siemens washing machines automatically adapt the wash time and the energy consumption to the amount of laundry in the machine.

iQdrive

The iQdrive.
Is the most economical, fastest, quietest and durable motor we have ever built, hence why it comes with a 10-year motor warranty and a 5-year parts and labour warranty. This specially designed motor at the heart of our machines is designed to last longer; meaning you'll never be without clean laundry, as well as being extremely quiet, meaning you can enjoy a conversation without having to compete with your washing machine.

The iQdrive together with our silent antiVibration design, the circular design on the side of machine, gives you a fast, efficient laundry service that does not take centre stage.

Textile Guard
Keeping clothes multi-functional. What used to require a trip to the dry cleaners can now be done quickly and easily at home with the help of your washing machine. Working with Nikwax, Textile Guard applies a waterproof treatment to breathable fabrics, prolonging the life of high-quality functional clothing like winter jackets, fleeces and ski suits. Simply add the Nikwax treatment to your detergent drawer and select the Textile Guard option.

NIKWAX

rapid15
What can you do in an hour? Add the laundry to your list. Need a shirt cleaning an hour before you're due to leave the house? Don't panic! The rapid15 programme will save the day. Designed for those of us with hectic lives this wash cycle will clean your clothes when you are in a hurry. rapid15 washes, rinses and spins laundry in just 15 minutes. Combined with the speedy 40 minute drying programme of our tumble dryers, rapid40 will have your favourite shirt ready by the evening.

varioPerfect
Designed to work around your busy schedule. Giving you the choice, varioPerfect allows the setting of certain washes to be changed determined on what is most important to you, time or energy. Decreasing a washing machines cycle time by up to 65%*. speedPerfect is ideal for getting through your laundry quickly without compromising on quality or cleanliness, whereas ecoPerfect lengthens the time of a cycle by reducing the machines energy consumption by up to 50%**.

Reload Function
Ever forgotten to put an item of clothing in the wash? Have you ever started a wash only to realise you've left something out or included something you shouldn't have? The reload function is the perfect solution for when your laundry is on the wrong side of the drum door. Simply hit the button to pause the cycle, the door will then open at the next available opportunity and you can add or remove your extra washing. Dirty clothes will rarely be missed from the wash again.

Less Ironing
Helping to keep clothes crease free. Minimising your laundry tasks the Less Ironing option included on Siemens washing machines is going to free up your time. At the touch of a button Less Ironing can be added to your selected programme, ensuring the machine gently and evenly drains the water and reduces the spin speed, both helping to keep your clothes crease free, meaning a lot less ironing.

*Cottons 40°C: Standard programme compared with speedPerfect option.

**EU label standard cottons 60°C programme with ecoPerfect option.

All designed to **coordinate beautifully** with your Siemens appliances

Home Laundry

Welcome to a range designed around you.

iQ700

Exceptional design allied with seriously innovative technology is the basis of our premium models.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ300

Good looking appliances with Siemens build quality and equipped with an attractive selection of smart features.

A Quick Feature Guide

Reference key:

Model does have this feature

Model does not have this feature

Key functionality – Washing Machines

Energy efficient class A+++ All Siemens washing machines automatically adapt the wash time and energy consumption to the amount of laundry in the machine.

Auto programme Whether normal or delicate items – the automatic programmes adjust the detergent dose and the entire wash cycle to the needs of your laundry to optimum effect. Fully automatic, including adding extra detergent if your washing is very dirty.

i-Dos Determines how much detergent is needed for each wash, based on the weight of the laundry and programme used.

sensoFresh programme Get rid of odours such as cigarette smoke or kitchen smells – the sensoFresh programme provides odour elimination in short time, even for sensitive and non-washable textiles. Active oxygen neutralises smells in just 30 to 45 minutes, depending on the intensity of the odour.

Wi-Fi ready With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

Capacity Capacity of laundry your machine can hold (kg).

iQdrive The frictionless design of the iQdrive motor means no wear and tear, resulting in a quieter machine with an increased life span.

5 Year Warranty A free 5 year warranty is available on selected freestanding models, where indicated, which covers parts, labour and call-out charges.

Washer Dryers

Energy efficient class A All Siemens washer dryers are rated A for energy efficiency.

Washing capacity The large washing capacity ensures you can wash clothes with fewer loads.

Drying capacity The drying capacity ensures you can dry clothes effectively.

airCondensation uses no additional water in the drying process, making it an extremely energy-efficient appliance. This translates into cheaper energy bills, saving resources.

iQdrive The frictionless design of the iQdrive motor means no wear and tear, resulting in a quieter machine with an increased life span.

autoStain removal system The autoStain removal system is available on the WD15H520GB. With 6 stain options, the need to pre-wash stained clothes or use specialist detergent is eradicated.

varioPerfect The choice between speedPerfect and ecoPerfect; varioPerfect allows the setting of certain washes to be changed determined on what is most important to the user; time or energy.

2 Year Warranty For complete peace of mind, all Siemens appliances come with a free 2 year warranty as standard.

Tumble Dryers

Energy efficient class A++ All Siemens heat pump tumble dryers are at least rated A++ for energy efficiency.

Wi-Fi ready With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

**Capacity** Capacity of laundry your machine can hold (kg).

Drum interior light To give you optimum visibility when loading and unloading your laundry.

Heat pump Heat pump dryers are condensation dryers equipped with a special heat pump technology. In contrast to classic condensation dryers, here energy in the form of heat is not discharged into the environment; instead it is retained for the drying process.

iQdrive The frictionless design of the iQdrive motor means no wear and tear, resulting in a quieter machine with an increased life span.

selfCleaning condenser The automatic, selfCleaning condenser system uses water generated during the drying cycle to clean the heat exchanger three to four times during every cycle, meaning the consumer doesn't have to.

5 Year Warranty A free 5 year warranty is available on selected freestanding models, where indicated, which covers parts, labour and call-out charges.

i-Dos Washing Machine

The best in **technology** & **design**

iDos

Saving you time, the i-Dos system automatically determines the exact amount of liquid detergent needed for each of your laundry cycles, depending on the weight of the load and what programme is used – for perfectly clean laundry with minimal use of resources.

Experience exceptional quality and intelligent innovation with our stylish **iQ700** i-Dos washing machine.

Our premium iQ700 washing machine features iSensoric technology that takes care of your laundry for you: the intelligent i-Dos dosing system and autoStain removal work together with the quiet iQdrive motor to ensure your clothes receive the perfect wash every time.

Other product features

antiVibration
Having antiVibration technology built-in to the design of the machine makes the appliance more stable, which in turn makes it quieter.

autoLoad Plus
Ensures that the correct amount of detergent is used depending on the weight of washing and the maximum weight allowance for certain programmes.

Consumption value indicator
See which programmes use less energy and water with the consumption value indicator.

Drum clean
An automatic alert after 20 washes to run the Drum Clean programme on a 90℃ or 60℃ wash keeps the appliance clean and odour free.

Drum interior light
To give you optimum visibility when loading and unloading your laundry.

Foam detection system
Detects if too much foam has been created during a wash, if so, it will adjust the drum movement and add an extra rinse cycle if necessary.

hydroSafe
Ensures you never have to deal with the inconvenience of a leaking connection. Protects against water damage.

Less Ironing option
At the touch of a button 'Less Ironing' can be added to a selected programme, ensuring the machine gently and evenly drains the water and reduces the spin speed, helping to keep clothes crease free.

rapid15
Rinses, washes and spins lightly soiled clothing in just 15 minutes, designed for those with hectic lives this wash cycle will clean clothes when you're in a hurry.

rapid40
Leaving clothes ready to iron in only 40 minutes thanks to the optimised temperature control and customised cool-down phase of the rapid40 programme.

reload
The reload function allows the machine to be paused and the door opened at the next safe opportunity. It's the perfect solution when an extra item needs to be added to the load.

Textile Guard
Working with Nikwax, this programme applies a waterproof treatment to breathable fabrics, prolonging the life of high-quality functional clothing like winter jackets, fleeces and ski suits.

Key features
- Maximum spin speed: 1400rpm/1200rpm
- Noise level washing: 55dB (A) re 1pW
- Noise level spinning: 76dB (A) re 1pW
- 15 programmes: power wash 60, easy care dark, shirts/blouses, textile guard re-proofing, mixed fabrics, hygiene, rapid15 minute quick wash, duvet, drum clean with reminder, rinse/spin/drain, handwash/wool, delicates
- Touch control buttons: less ironing, time delay, temperature selection, start/reload, speedPerfect/ecoPerfect, water & rinse plus, spin speed selection
- varioPerfect – change certain washes depending on what is important to you; time or energy
- Time delay 24 hours and time remaining indicator
- Dimensions (HxWxD): 84.8 x 59.8 x 55cm

Tumble dryers

Efficient drying, efficient energy consumption.

Siemens innovation for complete laundry care.

Sensor drying
All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. Sensors in the drum continually monitor the residual moisture in the laundry. They detect when the load has reached the selected drying level, and move the programme to the final cool-down period.

So your laundry is afforded the utmost protection, while neither energy nor your time is wasted.

The rapid40 drying programme
Washing laundered with the rapid15 wash programme is perfectly dry in only 40 minutes, thanks to optimised temperature control and a customised cool-down phase.

A lot less ironing
The Less Ironing option extends the anti-crease phase period at the end of the cycle to up to 120 minutes. The gentle tumbling motion of the softDry drum system leads to fewer creases in your laundry – so you can spend less time ironing.

Dry washing, dry room
88% of the humidity generated by the drying is kept within our dryers. Other dryers on the market aren't anywhere near as good at this, and so produce far higher air humidity in the room.

Heat Pump
High-performance and highly-efficient – let yourself be fascinated by the state-of-the-art technology of Siemens heat pump dryers. Heat pump dryers are condensation dryers equipped with a special heat pump technology. In contrast to classic condensation dryers, here energy in the form of heat is not discharged into the environment; instead it is retained for the drying process. This is how Siemens heat pump dryers achieve impressive energy values and consume significantly less energy than condensation dryers.

selfCleaning condenser
The absolute highlight of the heat pump dryers is the automatic self-cleaning of the condenser. It is integrated into many Siemens appliances and cleans the condenser automatically – sensor-controlled and intensively during each drying cycle. The result is a continually lint-free condenser that keeps energy consumption constantly low at all times.

Siemens heat pump dryers can also be set up – like all condensation dryers – flexibly anywhere since the condensed water is collected in a separate container integrated into the appliance.

softDry drum system
The softDry drum system, the first of its kind in the world, ensures a stable drying temperature and constant airstream in the drum. The soft, wave-like paddles stir the warm air and distribute the laundry gently and efficiently. The drum surface improves airflow so the laundry glides over the drum as if floating on a cushion of air, reducing mechanical wear and tear on your fabric.

When space is an issue – stack.
When you're short on space, a Siemens stacking kit provides the answer. It's an ergonomic solution too, because the tumble dryer is mounted at a convenient height for loading and unloading. Choose either the basic kit, or the version that includes a pull-out shelf for putting the laundry on.

Heat pump

Tumble dryers that maintain energy efficiency for life.

A++ Energy | selfCleaning condenser

A maintenance free machine you can count on for years to come. Unlike other dryers, our tumble dryers (WT4HY790GB, WT47W590GB, WT45M230GB) are built with an automatic selfCleaning condenser system, that uses water, collected during the drying cycle, to clean the heat exchanger three to four times during every cycle. Meaning you no longer have to remove and rinse the component after every cycle, as the machine does it for you.

If the heat exchanger is not cleaned regularly to remove this build-up, a machine's energy consumption rate quickly rises and its energy rating can drop from A to B, C and lower. By automatically selfCleaning several times during a cycle our Siemens condenser dryer maintains its A++ energy rating for life. With the selfCleaning condenser system you get a maintenance free machine that maintains peak efficiency and lower energy bills.

Tumble Dryer

The best in technology & design

selfCleaning condenser

selfCleaning condenser

The condenser is automatically cleaned vigorously during every drying cycle. Several times. The result: a lint-free condenser that keeps energy consumption consistently low – extremely low.

Our Wi-Fi enabled **iQ700** tumble dryer conveys an elegant impression of absolute quality and intelligent innovation.

iSensoric heat-pump dryer with Home Connect: selfCleaning condenser and easy use from wherever you are via the Home Connect App.

Washer dryers

Laundry care with one appliance.

It couldn't be more convenient: Siemens washer dryers are the ideal all-rounders for your laundry care. They combine the innovative functions of modern washing machines and dryers in one appliance to save effort, space and time.

At the touch of a button, with their large display and clear operation, you can conveniently control the variety of cycles from both worlds: washing and drying.

Model shown: **WD15H520GB** washer dryer

A breath of fresh air.

Some things only a washer dryer can do.

Being kinder to the environment with every wash, our energy-efficient appliances use no additional water during the drying process.

What does this mean for you? Cheaper utility bills.

With state-of-the-art technology built into our appliances Siemens have some of the most energy efficient washer dryers on the market. The airCondensation systems in our washer dryers uses no extra water during the drying process, making it an extremely resource efficient appliance. Using as little as 4.76 kWh of energy and the minimum water to wash and dry a full load of laundry the appliance earns itself an ultra-efficient rating of A. Working quietly, automatically and saving you money on utility bills.

From dirty to perfectly clean and dry, effortlessly the WD15H520GB can wash and dry up to 4kg of laundry non-stop in a single operation. That's the equivalent of 7 pairs of trousers or 18 shirts, carefully and perfectly washed and dried. Load your wash into the drum, switch on the washer dryer and relax. When it's done remove the clean or cupboard-dry laundry – nothing could be easier, more convenient, whilst also saving you space in your kitchen.

Dishwashers

Extra innovations for extra shine.

As you'd expect, Siemens dishwashers take full advantage of the latest technologies.

Designed to fit in around your hectic lifestyle our dishwashers feature efficient, time saving and environmentally conscious programmes that are going to make your dishes shine. With sleek stylish design, both inside and out, they are designed to complement your modern home.

Model shown: **SN278I36TE** Zeolith® dishwasher with clearText TFT Display

The power of intelligently linked sensors.

The unique quality that distinguishes the iSensoric technology is the connection of all the sensors.

iSensoric technology
Siemens iSensoric is the ground-breaking innovation in dishwashing that stands for automatically measuring, detecting, calculating and controlling every step of the cleaning process, so you can get on with your day.

1 Auto Programmes
Brilliant results at the push of a button. As soon as one of the auto programmes is activated, the aqua sensor automatically measures the cloudiness of the water to precisely adapt the amount of water needed for optimal cleaning. In interaction with other intelligent sensors, the iSensoric control unit steers the whole washing and drying process to deliver brilliant results every time.

2 aquaStop®
For a lifetime guarantee against water damage. This safety system prevents any water damage using the intelligent network of sensors. Regardless of whether the inlet hose or the appliance is leaking, the security sensor immediately detects it and activates the aquaStop®. Siemens guarantees this safety with a lifelong warranty.

3 intensiveZone
For pots, pans and delicate dishes all in one wash. Activating the intensiveZone automatically increases the spray pressure in the lower basket. This way, heavily soiled pots or pans can be cleaned thoroughly, while delicate dishes in the upper basket are treated gently and safely. As part of iSensoric, the water volume sensor ensures an optimal amount of water within the dishwasher – for superior cleaning performance.

4 TFT Display

Crystal-clear operation. The intuitive clearText TFT Display houses the iSensoric control unit which processes the information given by each sensor to ensure brilliant results. With the ability to think, the real-time clock is able to display the exact time each load will be ready, the info button brings up written programme information and the Eco Forecast feature shows the energy and water consumption for each cycle. This intelligence makes each dishwasher easy to use.

Innovative technology for super clean glasses every time.

Added extras designed to make life easier.

With cutting-edge technology, Siemens dishwashers give you more than just clean dishes. Functional and specialised programmes mean you may no longer want to select the quickest wash.

Now, it's possible thanks to the new brilliantShine system with Zeolith® drying. Great moments start with small details. Such as brilliantly dry and shiny glasses directly out of your dishwasher – without any special effort or additional polishing all whilst using minimal water and energy.

brilliantShine system

Add an extra sparkle
Our brilliantShine system combines our low temperature glass care programme with our advanced water softening technology and Zeolith® drying to ensure your glassware is taken care of. Straight from dishwasher to table, Shine&Dry gives you streak-free, shining glasses. Harnessing the power of Zeolith® at its best, the special drying cycle also works just as well on plastics, pots and pans. Saving you time, you no longer need to give glasses an extra towel dry to smarten them up; allowing you to spend more time with your guests.

Zeolith®-Drying

Zeolith®
Using advanced drying technologies Siemens dishwashers keep energy consumption to a minimum. Zeolith®, a form of naturally occurring mineral has the astonishing ability to absorb moisture and convert it to heat.

What does this mean for you? The heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of your dishwasher for the drying process (as with a standard drying system). This results in perfect drying, with less energy usage.

A+++ Energy

A+++ Energy
The Zeolith® mineral is stored in the depths of the dishwasher; this regenerates itself and keeps working for the entire lifetime of the machine. Combine this with the economy 50°C programme to get brilliant results with minimal energy. Using the latest sensor technology, our dishwashers don't just save water, they also save energy. All Siemens dishwashers have an energy rating of at least A++, with our iQ500 and iQ700 Zeolith® models boasting a maximum efficiency A+++ rating. Saving energy is important; not just to help reduce your utility bills, but also to be kinder to the environment.

varioDrawer Pro

varioDrawer Pro
The varioDrawer Pro adds a third shelf for cutlery and removes the need for a cutlery basket, creating more space. Knives, forks and spoons are placed on their side, leaving them easier to remove when emptying the dishwasher. Convenient blue touchpoints also indicate all the adjustment options available, such as lowering the side sections to accommodate bulkier items like espresso cups and ladles. Perfect for the extra-large dinner party, you can fit more in, making the after dinner clean up quick and simple.

varioFlex Pro basket system
The varioFlex Pro basket system is designed to hold larger plates and allows you to create extra space for pots and pans with ease. Blue touchpoints inside the baskets indicate all the adjustment options available at a glance. It's never been as easy to adjust the slats to suit each load, making the inside of your dishwasher constantly adaptable. varioFlex Pro baskets ensure your dishwasher fits in with your lifestyle, no matter how much it may change day after day. Enjoy fewer washes and more flexibility.
TFT Display

clearText TFT Display with real-time clock
For those that lead busy lives, it's important to plan and manage your time effectively. Thanks to the real-time clock display, it's now possible to set the exact time that you want your dishes to be ready.

emotionLight
Creating a relaxed ambiance in your living space, the emotionLight uses LED lights to reflect off your brilliantly-cleaned glasses and create a cool blue sparkle from inside your dishwasher. They never need to be changed and will last the lifetime of your dishwasher.

WiFi ready / HOME CONNECT
Wi-Fi Home Connect
Connect your Wi-Fi ready dishwasher with the Home Connect App to easily select programmes and options to start your dishwasher from wherever you are, whenever you want. Thanks to this, you can have the dishes ready exactly when you need them. When the dishes are clean and dry, the Home Connect App sends you a push notification to let you know.

The Tab Counter also provides more convenience: simply let the Home Connect App know when you buy new dishwasher tablets and you can always monitor the amount of tablets you still have from wherever you are. If your supply is running low, the Home Connect App even sends you a push notification, reminding you to get some.

hydroDry
Protect your glasses from cracking with hydroDry. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress. And as existing heat is used to gently warm the rinse water, it's energy-efficient too.

Extra innovations for extra shine.

Siemens dishwashers feature modern design and innovative ideas that make life easier.

5 year warranty
For complete peace of mind, all Siemens appliances come with a free 2 year warranty as standard. A free 5 year warranty is available on selected freestanding models, where indicated, which covers parts, labour and call-out charges.

10 year anti-rust warranty
Due to advanced materials and manufacturing technologies, in addition to our standard appliance warranty, we are able to provide a free of charge warranty against rusting-through of the dishwasher's inner cavity.

varioSpeed Plus
Ever needed your dishes cleaned quickly, forgotten to put the dishwasher on in the morning, or simply need clean plates before your guests arrive? That's why we've introduced varioSpeed Plus, the perfect time saver. varioSpeed Plus reduces the time it takes to wash and dry a full load down to a third.

Ideal when you need your cutlery and plates in a hurry, just press the varioSpeed Plus button in conjunction with your desired programme* and it will run the dishwasher significantly faster without compromising on wash quality.

Used together with the Eco 50 programme, varioSpeed Plus will wash and dry a full load in just over an hour. Giving you time saving solutions when you need them the most and sparklingly clean dishes in super swift time.

*Except quick wash 45°C programme

iQdrive
The frictionless design of the iQdrive motor means minimal wear and tear, resulting in a quieter machine with an increased life span.

dosageAssist
Ensuring that your dishes receive the best possible clean every time, dosageAssist quickly and evenly dissolves your dishwasher tablets throughout the entire machine, leaving no mess for you to clean at the end of the cycle. Rather than the detergent tablet dropping to the bottom of your machine, it falls into an innovative basket at the front, allowing it to dissolve completely leaving no mess and a brilliant clean.

Wine glass holder accessory
No longer will you choose to wash your wine glasses by hand. Available as standard in our fullsize iQ500 models, this accessory holds and optimally cleans up to four long stemmed wine glasses safely and securely. The result? Sparkling glasses that have been safely cleaned and dried, every time. The accessory is also available to buy.
Part number: SZ73300

rackMatic™
Ever found yourself loading and reloading the dishwasher because the last pan doesn't fit? rackMatic™ conveniently allows you to raise and lower the height of the top basket, even when the dishwasher is full. With the simple flick of a lever you can adjust the basket to suit your washing needs. This increased flexibility ultimately saves you time, letting you get back to more important things.

There's no need to do separate washes with intensiveZone.

intensiveZone
With intensiveZone, you can wash delicate glasses and burnt cooking pans in the same wash. The increased spray pressure in the lower basket ensures stubborn stains are removed, whilst delicate items are protected in the top basket. This means there is no need to separate washes or soak pans overnight, saving time. And with iSensoric, the water volume sensor ensures an optimal amount of water within the dishwasher at all times.

Delicate

Intensive

Dishwashers

Welcome to a range designed around you.

iQ700
Reserved for our premium dishwasher range. iQ700 stands for exceptional design allied with seriously intelligent and innovative technology.
iQ500
Exuding class and refinement, these machines unite first-class features with top-class technology.

A Quick Feature Guide

Key functionality

A++ Energy

Energy efficiency class All Siemens freestanding dishwashers are rated at least A++ for energy efficiency.

WiFi ready

Wi-Fi ready With Wi-Fi-enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

42 dB Extremely quiet

Noise At just 42dB, you will barely hear our dishwashers running, leaving you to relax in peace. Perfect for open plan living.

TFT Display

TFT Display Siemens dishwashers with clearText TFT Display allow you to see programme information easily in high resolution with clear text and icons, making the use of your dishwasher even easier.

varioDrawer Pro

varioDrawer Pro By adding a third shelf for cutlery, varioDrawer Pro removes the need for a cutlery basket and creates more space.

varioFlex Pro basket

varioFlex Pro basket Creating extra space for pots and pans by adjusting slats to suit different loads, the inside of the dishwasher is constantly adaptable.

9,5 L Water

Water Consumption Indicates the average water consumption per cycle of each dishwasher based on the Eco 50 programme using cold fill water.

Zeolith®-Drying

Zeolith® is a naturally occurring mineral that converts moisture to heat. This heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of the dishwasher for the drying process.

Other product features

dosageAssist
Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle.

duoPower
Benefitting from 2 spray arms under the top basket as opposed to just one, duoPower ensures that dishes in all areas of the dishwasher receive the best possible clean. (Feature available on slimline models)

Heat exchanger
Heat generated from the wash pre-heats water for later in the cycle, thereby saving energy.

hydroDry
The hydroDry system extracts moisture from the air in the machine efficiently, leaving the contents of the dishwasher to dry hygienically without the need for external air.

hydroSafe
Cuts off the water supply from the tap if a leak is detected, even if the dishwasher isn't in use. Precision protection for your kitchen.

hydroSensor
Makes sure that the optimum temperature is used depending on how dirty the dishes are, meaning that dishes are perfectly clean the first time round.

Hygiene Plus
The Hygiene Plus setting eradicates 99.9% of germs by super heating the final rinse. Ideal for chopping boards and food containers, Hygiene Plus helps to keep your family fit and healthy.

loadSensor
By monitoring that the optimum amount of water is flowing through the dishwasher throughout the cycle, loadSensor helps to ensure that dishes are cleaned thoroughly.

Machine Care
Designed for use with a dishwasher cleaning detergent, the Machine Care programme offers an easy way to give your dishwasher a deep clean.

rackMatic™
Conveniently allows the user to raise and lower the height of the top basket to create more or less space, even when the dishwasher is loaded.

Real-time clock
Thanks to the real-time clock display, it's now possible to set the exact time that you want your dishes to be ready by.

Shine&Dry
Straight from dishwasher to table, Shine&Dry gives you streak-free shining glasses.

varioDrawer Plus
By adding a third shelf for cutlery, varioDrawer removes the need for a cutlery basket and creates more space.

varioFlex Plus
Making the most of the space within the dishwasher, varioFlex Plus lets you adjust slats in the baskets to suit each load making the inside of your dishwasher constantly adjustable.

varioSpeed Plus
Use the varioSpeed Plus button to run the dishwasher significantly faster without compromising on wash quality.
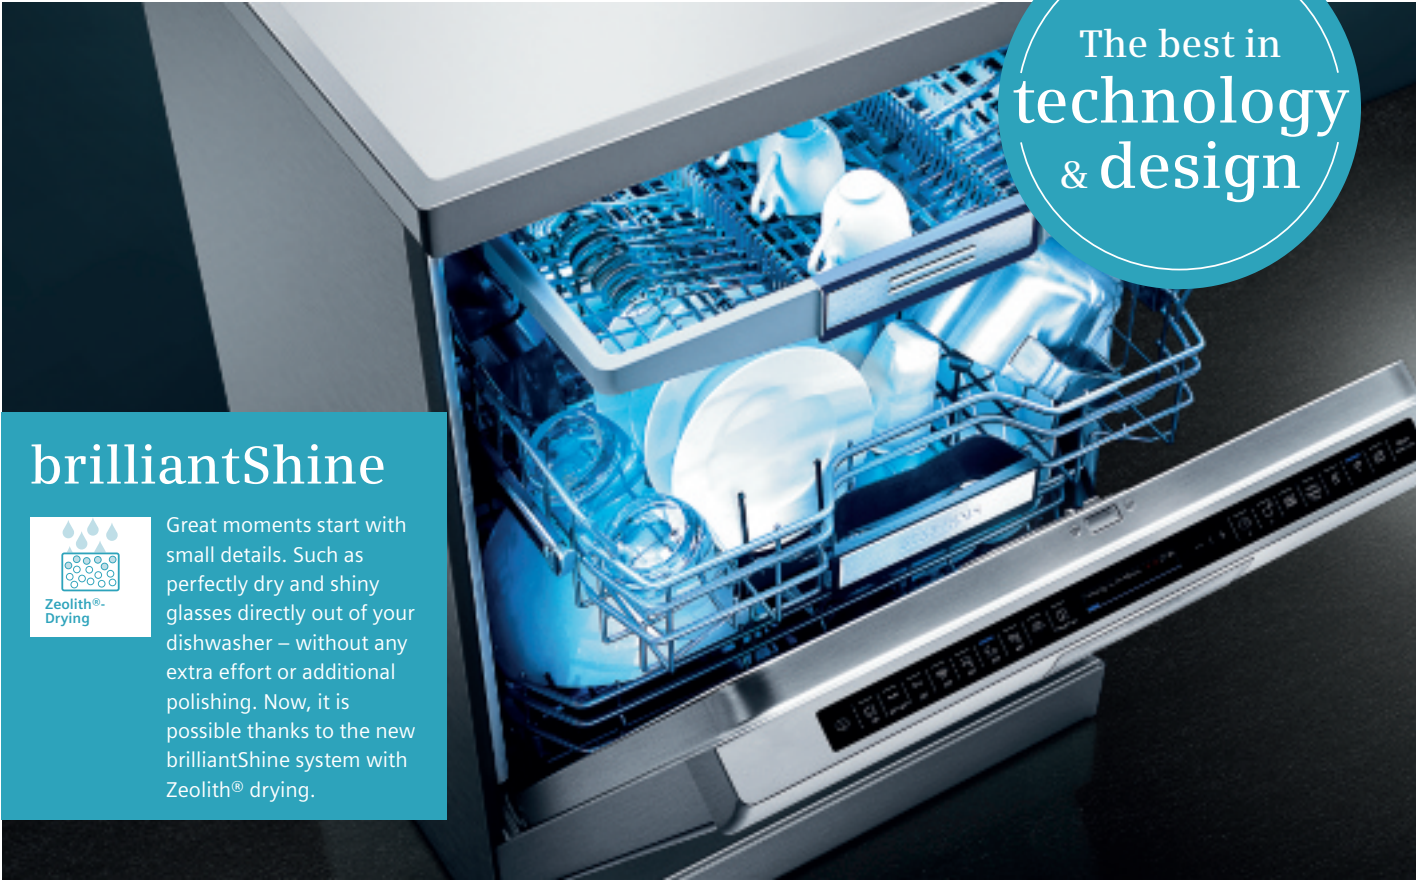

Wine glass holder
This accessory cleans up to four long stemmed wine glasses safely and securely. The innovative lock mechanism ensures glasses are stable in the basket, yet with minimal contact areas to avoid any water pooling or streaks.

brilliantShine

Zeolith®-Drying

Great moments start with small details. Such as perfectly dry and shiny glasses directly out of your dishwasher – without any extra effort or additional polishing. Now, it is possible thanks to the new brilliantShine system with Zeolith® drying.

Stunning design and intelligent technology, our **iQ700** dishwasher features brilliantShine system with Zeolith® drying, giving you brilliantly dry and shiny glasses directly out your dishwasher.

Keeping your energy consumption to a minimum, Siemens iQ700 dishwashers use Zeolith®, to create the heat needed for drying dishes. This combined with the high resolution clearText TFT colour display, varioSpeed Plus for faster washing, and the convenient varioDrawer Pro, gives you a dishwasher that is easy to use and designed to perform.

Slimline dishwashers

Small on stature, big on features.

The less space available, the more valuable that space becomes.

This is especially true of a small kitchen, where a lot of space can be gained by using it efficiently. Our 45cm slimline dishwasher can help you do just that.

duoPower spray arms work hard to reach every inch of the basket.

Space-saving intelligence.

The 45cm dishwasher from Siemens helps you use space efficiently, whilst offering the most innovative Siemens technology, advanced operating convenience and optimum performance.

duoPower
Although the 45cm slimline series dishwasher may be small, it is still intelligent when it comes to powerful cleaning. Benefitting from 2 spray arms under the top basket as opposed to just one, duoPower ensures that your dishes receive the best possible clean, with 2 duoPower arms working doubly hard to reach every inch of the basket.

A++
Energy

Energy efficient
Siemens dishwashers are designed to thoroughly clean dishes, but quietly, whilst using the minimum of water and energy. Our 45cm slimline model also features the varioDrawer Pro cutlery tray, giving you nothing but outstanding results. With Siemens, dishes have nowhere to hide.

9,5 L
Water
Resource efficiency
Using only 9.5 litres of water to wash 10 standard place settings in one cycle, our iQ500 45cm slimline dishwasher is extremely resource efficient too.

Freestanding Slimline Dishwasher

The best in technology & design

varioDrawer Pro

Adding a third shelf for cutlery, varioDrawer Pro removes the need for a cutlery basket and creates more space, even for espresso cups.

varioDrawer Pro

When space is at a premium, our **iQ500** slimline dishwasher conveys an elegant impression of absolute quality and intelligent innovation.

Experience the brilliance of optimally cleaned and dried dishes with our iQ500 slimline dishwasher. With innovative technologies and functions that also meet the highest demands for performance, convenience, and energy efficiency.

■ Yes, model has this feature.   – Feature not available for this model.

[1] Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.
[2] The consumption per cleaning cycle of the "Eco 50" programme using cold water fill.
[3] Includes Machine Care programme where included
[4] We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute.

Inlet valve connected directly to ¾" screwed joint.

SZ73300 – Wine glass holder
SZ73100 – Cutlery basket
SZ73145 – Slimline cutlery basket

Cooling

Super efficient, super stylish.

Elegant, functional and packed with technology your new Siemens fridge freezer is going to become a talking point in your kitchen.

Whether you want an American-style fridge freezer that has the wow-factor; freestanding, under counter or a side by side option that is going to save you space, Siemens has a wide range to choose from. Our energy efficient appliances are packed with food preservation and flexible storage solutions that are going to suit your hectic lifestyle. With a stylish design that fits into any modern home our high spec fridge freezers are no longer just a place to store your favourite foods.

Model shown: **KA90IVI20G**

Fresher food for longer with iSensoric.

The unique quality that distinguishes the iSensoric technology is the connection of all the sensors.

1 freshSense

Fresh food, guaranteed for longer. With conventional fridges, varying surrounding temperatures and the continuous opening of the refrigerator door lead to temperature changes inside the appliance. To ensure this does not affect your food, iSensoric immediately reacts. The freshSense sensors activate the moment a change in temperature is registered, for example when products are stored away, and compensates for this change in an instant. Therefore the temperature always remains within the optimum range and your food stays fresh and delicious for longer.

2 noFrost technology

Defrosting the freezer is now done automatically. Siemens fridge freezers and freezers with iSensoric are equipped with intelligent sensor-controlled technology to save the hassle of defrosting the freezer. An air-circulation system guides the humidity to the outside of the refrigerator into an external evaporation tray, and sensors measure the degree of humidity and any frost production – ensuring the appliance is periodically defrosted without the need to turn off the appliance or empty it out. Also, ice no longer forms on the inside of the refrigerator, and the appliance's energy consumption remains consistently low.

3 touchControl

Total control at your fingertips. Thanks to the highly sensitive sensors, even the slightest touch of the touchControl display is registered and all the functions of the fridge freezer – such as temperature, alarm and holiday mode – can be immediately set. Furthermore, the touchControl display is also the communications hub for iSensoric, as this is where the data is collected from the various sensors for controlling other functions. For more convenience, the freezer and fridge can be controlled separately thanks to their independent cooling circuits.

4 Inverter motor

The intelligent inverter technology is a clever combination of the inverter motor and iSensoric. The sensors register every slight change in temperature or humidity inside the refrigerator, for example when the door is opened or warm food is stored. This information is then passed to the inverter motor, which adapts its need for energy accordingly. This means you can cool food intelligently and energy-efficiently, and thanks to the high-quality inverter motor, incredibly quietly.

Fresh water and ice on tap.

Plumbed in water at
the touch of a button
dispensing refreshing
ice-cool water and ice
both day and night,
Siemens puts you in
control of your fridge
freezer.

Fresh water and ice both day and night
Providing you with chilled, filtered water and crushed or cubed ice at the touch of a button, the water and ice dispenser built into iQ700 Siemens fridge and freezer is a convenient time saver. Serving you with a refreshing drink whenever you want, the ice dispenser can produce up to 140 ice cubes per day. With LED down lighting on our premium model, the ice and water dispenser is not only luxuriously convenient; it is also classically designed.

Electronic controls
With easy to use electronic controls Siemens fridge freezers never leave you in the dark. The electronic display allows you to precisely set and change the temperature of your fridge and freezer and select certain modes, such as Holiday Mode, putting the power of your new fridge freezer at your finger tips.

Stunning on the outside, beautiful on the inside
With a streamline design on the outside, Siemens fridge freezers are just as elegant inside. Superbly designed, with conveniently placed LED lighting, easyLift door shelves, a flexiShelf that folds down if you need additional shelf storage or neatly folds away if you don't. The bigBox in the freezer is perfect for stacking several pizzas or those pre-filled dessert glasses you need chilling for your dinner party; there's a place for everything.

Designed for an easy life.

With noFrost
technology you'll
never have the job of
defrosting the freezer
again.

No ice build up on freezer walls or food packaging
Who has time to defrost the freezer? Those with a Siemens noFrost freezer do, because there simply is no need to. Using an air circulation system to remove humidity and stop frost and ice building up on the freezer walls and packaging, the freezer looks after itself. Hassle free, you won't need to turn off the freezer to defrost and you can enjoy fresher food, no more soggy packaging and a frost-free freezer for life.

Because life's too short
For those models that come with lowFrost life is still made easier. lowFrost reduces the build-up of frost by up to 50%, meaning that you don't need to defrost the freezer as often, only once every 18 months to 2 years*. Designed to save you time and provide added convenience, you can spend your time on the things you enjoy, not defrosting your freezer.

*Dependent on how many times the door is opened and closed.

Fresh, fresher, hyperFresh.

hyperFresh technology

Reduce food wastage and take control of what you eat and when with hyperFresh. By providing the ideal environment, the hyperFresh Technology storage system keeps your food fresh for as long as it needs to – and even longer – so you can enjoy your food whatever comes up in your life.

hyperFresh Premium.
Fresh for up to **three** times longer.

Enjoy fresher food for up to three times longer thanks to hyperFresh Premium. Simply select the kind of fruit and vegetables you want to store with the new control and let the drawer regulate how much humidity your food receives. With the drawer, fish and meat can also be stored at the perfect temperature.

hyperFresh Plus.
Fresh for up to **twice** as long.

The new hyperFresh Plus drawer doesn't just store fruit and vegetables, it provides them with the right conditions to keep them fresh for up to twice as long. Whether it's fruit or vegetables, simply switch the control and the humidity will be adjusted for optimum storage of your food.

hyperFresh.
Enjoy freshness longer.

The hyperFresh drawer offers freshness for longer thanks to the rippled bottom which allows cool air to circulate around your fruit and vegetables easily. As a result, you can see the quality and feel the freshness.

hyperFresh 0°C drawers.
Custom freshness for fish and meat: available in all hyperFresh models.

The two hyperFresh 0°C drawers are especially designed for the cooling needs of fish and meat. Keep them fresher in ideal conditions near 0°C for up to two times longer. The separate compartments also avoid unpleasant smells to transfer and both boxes can be easily pulled out with one hand to make room for other foods and drinks, cooling them down quicker and providing refreshing drinks sooner.

The search ends here.
To find the appliance that's right for you, or to find out more about the features, just visit our website:
siemens-home.bsh-group.com/uk

All designed to coordinate beautifully with your Siemens appliances

Exceptional design, innovative technology.

5 Year Warranty

For complete peace of mind, all Siemens appliances come with a free 2 year warranty as standard. A free 5 year warranty is available on all freestanding cooling models, which covers parts, labour and call-out charges.

A+++ Energy

Energy rating
Packed with ingenious and energy efficient solutions, a Siemens appliance is perfectly designed for your convenience and practicality. And there is so much more that you won't even see, including the environmental benefits.

The multiAirflow System helps to circulate air around the fridge evenly, meaning that temperatures on all shelves to keep food fresher for longer. This also saves energy as the multiAirflow System cools down new warmer food entering the fridge 40% faster than a standard fridge meaning the motor doesn't need to work as hard to cool the fridge down.

When you're on holiday or a long business trip Holiday Mode will ensure that your food in the freezer stays cold enough to maintain freshness. Our fridges also feature a warning alarm that alerts you when the fridge door has been left open, ensuring that energy isn't needlessly wasted and preserving the food inside, both save money and energy usage.

Introducing ground-breaking innovation in cooling; iSensoric technology

iSensoric technology is an innovation that gives your Siemens cooling appliance a unique ability: thinking. It stands for automatically detecting, calculating and controlling the whole cooling process, so you can get on with your day.

multiAirflow System

Optimum temperature guaranteed
The multiAirflow System keeps food at the optimum temperature by circulating air around the fridge evenly to maintain the temperature on all shelves. This ensures freshness and saves energy as the system cools down new warmer food entering the fridge 40% faster than a standard fridge, because the motor doesn't need to work as hard to cool the fridge down.

touchControl

touchControl
Control all functions of the fridge freezer with a gentle touch using the clearly arranged touchControl panel. Precisely change the temperature setting with ease for more control of your appliance.

Electronic controls
With easy to use electronic controls Siemens fridge freezers never leave you in the dark. The electronic display allows you to precisely set and change the temperature of your fridge and freezer and select certain modes, such as Holiday Mode, putting the power of your new fridge freezer at your finger tips.

LED Illumination

Elegant, energy efficient lighting
LED lighting is the most efficient lighting available. Now integrated seamlessly into the side walls of the fridge, they give maximum illumination and no loss of fridge space. The freezer drawer is also lit in the same way with bright, non-glare light. We also have soft start lighting in all of our noFrost bottom freezers which creates a sophisticated illumination.

bigBox

Perfect for entertaining
Big enough for your lifestyle, the bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright. Ideal for the holidays and entertaining alike.

Cooling

Welcome to a range designed around you.

iQ 700

Exceptional design allied with seriously innovative technology is the basis of our premium models.

iQ 500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ 300

Elegant appliances with Siemens build-quality and equipped with an attractive selection of smart features.

Model does not have this feature

Key functionality – Fridge Freezers, Fridges and Freezers

5 Year Warranty Available on our range of fridge freezers, upright fridges and upright freezers, the 5 year warranty covers parts and labour.

Wi-Fi ready With Wi-Fi-enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

hyperFresh premium The "dry" zone and "dewpoint" zone within these drawers determine how much humidity food receives. Storing foods at their optimum humidity can help them last up to 3 times as long. This creates less food wastage, meaning fewer trips to the supermarket and cutting down on food bills.

noFrost Intelligent noFrost technology completely stops the build-up of frost and ice – for life. Not only a time saver, noFrost also ensures that the cavity space within is not compromised by frost.

hyperFresh plus Locking in minerals and nutrients, fresh food can last twice as long as it does in a standard vegetable drawer in the Siemens hyperFresh Plus drawer.

multiAirflow System Moderates the fridge temperature when new food is added, cooling down food 40% faster than a standard fridge.

hyperFresh Keep food fresh in this fruit and vegetable drawer with rippled bottom which allows cool air to circulate around your food easily.

touchControl Control all functions of the fridge freezer with a gentle touch using the clearly arranged touchControl panel.

American Fridge Freezers

Energy efficient cooling All Siemens cooling appliances are rated at least A+ for energy efficiency, which means they use 40% less energy compared to their A-rated equivalents.

Wi-Fi ready With Wi-Fi-enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

5 Year Warranty Available on our range of American-style fridge freezers, the 5 year warranty covers parts and labour.

hyperFresh technology hyperFresh technology is designed to store your food correctly and keep food fresher for longer. hyperFresh premium keeps food fresh for up to 3 times longer than standard food drawers.

iceDispenser These models are able to dispense ice when needed thanks to a plumbed water connection. Depending on model, ice is available as cubes or crushed.

waterDispenser Models with a water dispenser are able to dispense water thanks to a plumbed water connection. For fresh and cool drinking water whenever you need it.

LED Illumination Integrated seamlessly into the side walls of our cooling appliances, LED lighting is very efficient and gives maximum illumination of your fridge and freezer.

multiAirflow System Moderates the fridge temperature when new food is added, cooling down food 40% faster than a standard fridge.

noFrost Intelligent noFrost technology completely stops the build-up of frost and ice – for life. Not only a time saver, noFrost also ensures that the cavity space within is not compromised by frost.

Wine rack A wine rack is available on some models which is the perfect place to store wine of all varieties and make the best use of space in your fridge.

Other product features

airFresh filter
Shelves separate food, the airFresh filter separates smells, ensuring that the fridge smells fresh at all times.

antiFingerprint
Keeps the fridge looking sleek and spotless on the outside, adding to the overall ambiance of the kitchen.

bigBox
The bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright, ideal for the holidays and entertaining alike.

easyLift
Easily adjustable door trays and glass shelves that can be moved even when full. Now that's convenience.

flexiShelf
Extra height, extra storage space, extra length, flexiShelf gives you the flexibility within your fridge, depending on your needs.

LED electronic displays
Allows the user precision control over the temperature, ideal to accommodate different types of foods or quantity within the fridge/freezer.

superCool
Ensures that warmer food entering the fridge does not increase the fridge temperature, which can affect other food.

superFreeze
superFreezing makes sure that warmer food added to the freezer doesn't raise the freezer temperature, stopping food partially defrosting.

vitaControl
Providing precision temperature control in Siemens fridges and freezers ensuring optimum freshness.

Wrap around evaporator
This new technology creates more space in the freezer cavity, allowing for more innovations like bigBox for large food items, plus removable glass drawers.

The perfect fit for your kitchen.

Whether you want to save space or want to create a seamless finish to your kitchen, Siemens fridge freezers and upright fridges and freezers do not need any space at the sides for ventilation making it easy to fit into tighter spaces or form part of an overall seamless kitchen design.
No distance
This means that a 60cm refrigeration appliance will fit into that exact niche – no need for ventilation clearance, and the special door hinges mean the door will open within that space. So it's easy to update your current model with an efficient Siemens fridge freezer.

Tried and tested
All Siemens fridges and freezers are built to last. And rigorous testing ensures that our products meet all the requirements of our customers. Every single one of our appliances is tested before it leaves the factory. For 24 hours a day, components are tested continuously to the maximum tolerance possible for the equivalent lifetime of the appliance.

The shelves are strong enough to take 20kg of weight and our doors are weighted and then opened and closed by the handle 200,000 times during testing to ensure they are robust (200,000 times is equivalent to opening and closing the door 27 times per day for 20 years). Materials are not only tested for suitability and longevity, we also look at how they sound and feel when we use them.

Freestanding Fridge Freezer

The best in
technology
& **design**

hyperFresh premium

hyperFresh premium

The 0°C drawers are especially designed for the storage needs of fish and meat. Keep them fresher in ideal conditions near 0°C for up to twice as long.

Key features
- Fridge capacity: 290 litres
- Noise level: 39dB (A) re 1pw
- LCD electronic display
- 6 safety-glass shelves, of which 4 are height adjustable
- Door shelves in fridge door: 1 large and 2 small
- 1 dairy compartment in door
- LED lights
- Dimensions (HxWxD): 161 x 60 x 65cm

Upright Freezers

iQ700 — GS36DPI20
Stainless steel antiFingerprint

A* Energy

Key features
- Freezer capacity: 210 litres
- Noise level: 42dB (A) re 1pw
- activeCooling – quick and even temperature distribution on all shelf levels (interior fridge fan)
- Number of freezer flaps: 2
- 6 transparent freezer drawers
- iceDispenser with tap connection – cubes and crushed ice any time
- 4 star freezer rating
- Dimensions (HxWxD): 186 x 60 x 65cm

iQ700 — GS36NBW30G
White

A** Energy

Key features
- Freezer capacity: 237 litres
- Noise level: 42dB (A) re 1pw
- activeCooling – quick and even temperature distribution on all shelf levels (interior fridge fan)
- Number of freezer flaps: 2
- 5 transparent freezer drawers
- iceTwister for ice cubes on demand
- 4 star freezer rating
- Dimensions (HxWxD): 186 x 60 x 65cm

iQ500 — GS58NAW41
White

A+++ Energy

Key features
- Freezer capacity: 360 litres
- Noise level: 41dB (A) re 1pw
- activeCooling – quick and even temperature distribution on all shelf levels (interior fridge fan)
- Number of freezer flaps: 3
- 6 transparent freezer drawers
- 4 star freezer rating
- Dimensions (HxWxD): 191 x 70 x 78cm

iQ500 — GS36NAI31 Stainless steel antiFingerprint / GS36NAW31G White

A** Energy

Key features
- Freezer capacity: 239 litres

A** Energy

Key features
- Freezer capacity: 195 litres
- Noise level: 42dB (A) re 1pw
- activeCooling – quick and even temperature distribution on all shelf levels (interior fridge fan)
- Number of freezer flaps: 1
- 5 transparent freezer drawers
- Dimensions (HxWxD): 161 x 60 x 65cm

American Fridge Freezer

The best in technology & design

hyperFresh plus

hyperFresh plus: Be in control with the innovative humidity control, food can last twice as long in the specialist drawer. Not only does this keep in nutrients and minerals that help to create a delicious meal, but as food lasts for longer fewer trips to the supermarket are required – saving you time, effort and money.

hyperFresh plus

Our stylish **iQ700** American fridge freezer with innovative indoor electronics and intelligent noFrost technology.

Experience a truly stunning finish to this black glass American-style fridge freezer with touchControl electronic controls that seamlessly blend into the front panel. With beautiful design also comes more space for your fresh and frozen food finished with bright LED illumination.

iQ700 — KA92NLB35G
Black

A⁺⁺ Energy

Key features
- Noise level: 43dB
- Net fridge and freezer capacity: 592 litres
- Annual energy consumption: 385kWh
- 4 safety-glass shelves and 2 freezer shelves
- superCool function
- superFreeze function
- hyperFresh plus – adjustable humidity keeps fruit and vegetables fresh up to 2 x longer
- bigBox – capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright
- iceTwister for ice cubes on demand
- Dimensions (HxWxD): 175.6 x 91 x 72.5cm

5 Year Warranty | hyperFresh technology | iceDispenser | water Dispenser
LED Illumination | multiAirflow System | noFrost | Wine rack

Knowledge and expertise, where you need it, when you need it.

Siemens customer service

Siemens Home Appliances is part of BSH Home Appliances – winner of the Domestic and General Total Excellence and Quality Award for 2016.

Purchasing a Siemens appliance gives you access to our expert customer service team; for the lifetime of your appliance. With 2-5 year manufacturer's warranties on offer, multi-award winning products to choose from and assistance from an outstanding customer service department, you can be assured that the appliance you are buying will offer peace of mind.

Expert advice

Siemens Customer Service staff are full of knowledge and expertise, whether you have a simple question, want to order a spare or replacement part or require an engineer to visit your home. With engineers based locally across the country*, no one is better suited to help, and all Siemens repairs are analysed in advance so that we bring the correct replacement spare parts likely to be needed on the first visit**.

This is all supported by our outstanding online services, available 24 hours a day. Visit **siemens-home.bsh-group.com/uk** for product information, downloadable brochures, videos, instruction manuals and FAQs.

Telephone:
UK: **0344 892 8999** – Options 3 and 4
IRL: **(01) 450 2655**

Original replacement spare parts

Order replacement parts online and access exploded diagrams to help you locate the correct part. As a manufacturer we only use original spare parts and we keep a comprehensive range of parts available for up to ten years.

Telephone:
UK: **0344 892 8999** – Option 2
IRL: **(01) 450 2655**

† iQdrive warranty covers the cost of a replacement motor only. All labour and call-out charges outside of the 5-year warranty are not covered. A full copy of our warranty terms and conditions is available on request, or can be viewed via the Siemens website.

Calls to 0344 numbers are charged at the basic rate, please check with your telephone service provider for exact charges.

Greener products, cleaner planet.

Investing in the future, Siemens is committed to protecting the Earth's natural resources.

More than 80 percent* of the environmental impact occurring over a home appliance's lifetime is attributable to the usage phase. This is why, over the last few decades, BSH developers have been focusing on designing appliances that consume less energy, water and detergent. Environmental protection and energy efficiency are core topics within our corporate strategy.

What does this mean to you?
Our innovative energy-saving solutions from leading energy saving motors, to the brightest white, low-energy (LED) light can save you money and decrease your energy usage.

Energy saving comes automatically
Supporting environmental initiatives, the EU energy efficiency label is carried on all appliances, with class A+++ being the most energy efficient – reinforcing our focus on reducing energy consumption of our appliances, reducing our carbon footprint, and passing on this energy saving to you, the consumer.

World-class performance. Minimum environmental impact.

World-class performance
The Siemens i-Dos washing machine eliminates overdosing, cuts longer wash cycles and reduces unnecessary extra rinsing. This saves up to 7,000 litres of water and 11 litres of detergent per year, whilst cutting down the average cycle time by 14 minutes – amounting to a saving of two full days per year in the machine's running time.

All Siemens washing machines automatically adapt the wash time and energy consumption to the amount of laundry in the machine. Decreasing a washing machine's cycle time by up to 65%, speedPerfect is ideal for getting through laundry quickly, whereas ecoPerfect reduces the machines energy output by up to 50% by lengthening the time of a cycle. All of our core range of models carry the most efficient A+++ energy rating.

All Siemens fridge freezers have a minimum A+ rating for energy efficiency. All freestanding A++ and A+++ cooling appliances are now supplied with a green power cable and the freezers come with two green ice packs to help identify them as being super efficient.

Much is the same for dishwashers with all of the Siemens range rated at least A+ for energy efficiency. Siemens dishwashers with Zeolith® set the standard for A+++ energy efficiency. Zeolith® science combined with our smart energy-saving hydroDry technology helps to make our innovative dishwashers super efficient.

In buying a Siemens product you can expect outstanding world-class performance, as well as a clear conscience.
