IDO DESIGNERS

IDO bathrooms are well-known for their quality and well-developed design solutions. Their design has been carefully considered right down to the last detail. Our reputation is not accidental as our products are created by a team of talented and professional designers with diverse national backgrounds.

IDO Seven D bath

German designer **Adolf Babelin** believes that, first and foremost, products must express artistic values and facilitate their users' daily life. In his designing work, he considers most important the following of technical requirements, the quality of being easy to use and the impression of innovation.

Norwegian designer **Einar Hareide** started his career in design in the Swedish car manufacturer's Saab factory in 1985. Hareide has established his own company, Hareide Design. Its offices are located in Moss, Norway, and in Gothenburg, Sweden.

Kaarle Holmberg is an internationally renowned Finnish designer. In addition to product design, Holmberg has taught furniture and interior decoration design, and has shared his abundant knowledge with many students. Most of all he emphasizes the importance of quality in design as well as production.

IDO Seven D (ceramics and furniture), IDO Mosaik, IDO Shape and IDO Wave

Italian **Antonio Citterio** opened his first architectural and interior design office in 1981. His works can be found among the collections in the New York Museum of Modern Arts, in Centre the Pompidou in Paris and the Chicago Museum of Architecture and Design.

Pozzi-Ginori Join and Pozzi-Ginori Easy

Swedish designer **Fredrik Wallner** manages the Stockholm design company CODE. Wallner has worked as an interior architect for IKEA and in highly-reputed Scandinavian design and architectural offices.

Bathroom furniture
IDO Trend and IDO Select

IDO Showerama 8-5
shower cubicle

Hareide Design designs a variety of products ranging from furniture to cars. The company has won many design awards and its products can be seen, for example, among the permanent exhibition of the New York Museum of Modern Arts.

The new IDO Showerama 8-5 shower cubicle has been designed by **Dan Sevaldson**, a designer working in Hareide Design Gothenburg office. The goal was to design a shower cabinet which resembles an item of furniture and goes with any style of interior decoration.

Occupying the bathroom at the same time in the morning? This bathroom is equipped with an IDO Seven D washbasin set which has two basins. The solution is practical but also looks fantastic. Page 77.

IDO SCANDINAVIAN MODERN

Dark wood, white porcelain, clear lines and bold shapes. This is Nordic design at its best. The minimalist appearance is also practical as a large mirror cabinet and spacious base cabinet keep everything in order.

The IDO Seven D Image wall-mounted toilet was chosen for this set, and the final touches were added with a black cover and flushing button. Page 84.

Clear lines and simple design are the keywords for all the products ranging from washbasins to glass shelves.

How about infusing a bit of romantic atmosphere into your bathroom? Here is how you do it: use light colours for furniture and soft, curvy shapes for porcelain parts. Hide consumables and utensils in cabinets and drawers, and place beautiful towels, soaps and decorations on display to set the mood.

IDO ROMANTIC

Even the smallest of details can be a sight for sore eyes. The IDO Select range features inline drawer pulls which have been moulded into the doors and drawers. The IDO Select range is featured on page **32**

A beautiful bathroom is an investment you can enjoy every day. Having a customised bathroom makes morning routines, evening wash and other tasks more pleasant. And, thanks to our quality material, IDO bathrooms stay looking good for a long time.

The classical decor of the bathroom contains wood, porcelain and other natural materials.

IDO CLASSIC

Although the toilet has a traditional shape, the product is modern without any joints and cavities which could collect unnecessary dirt. Page 82.

Our renewed IDO Trend furniture emphasizes beautifully the calm and modest stylishness of this bathroom. The chosen material is elm. Its lovely pattern emerges elegantly on the large and clear surfaces of the furniture. Page 26.

The classical bathroom is formed out of beautiful wooden surfaces, warm colours and clear shapes. The classical style withstands the pressure of time and frequent usage, and it will keep its high-quality look for many years to come.

All IDO Seven D toilet seats and sinks feature a new, smoother glaze reducing dirt accumulating on the surface and helping you maintain the cleanliness of your bathroom. The new IDO Smart glaze reaches beyond visible areas: deeper into the drain section of the toilet seat, under the toilet bowl rim and inside the sink overflow opening.

IDO Smart is the common product name for all of the helpful and useful innovations found in IDO toilet seats, sinks, furniture, showers and other bathroom products. The smooth surfaces, clean lines and carefully designed details serve one main purpose. Our goal is to make it easier to keep the bathroom clean!

All IDO Seven D toilets include the integrated Fresh Toilet refresher, which automatically adds an appropriate amount of refresher for every flush. The refresher stick is placed safely into the water tank, preventing, for example, children from tampering with it.

IDOSMART

Thanks to a unique overflow system, you can dive deep into your warm bathwater without a care.

IDO Seven D toilet seats are now equipped with the handy Quick Release & Slow Close hinges. The smoothly lowering toilet seat and cover are easy to detach during cleaning.

IDO Showerclean is an easy-to-use general cleaning detergent for showers and the entire bathroom. Say good riddance to stains and calcification. The phosphate-free IDO Showerclean is an environmentally friendly choice. Contact your IDO retailer for Showerclean!

BEGIN WITH THE DESIGN

A bathroom should always be built and redecorated with careful planning and design. Seeking professional help to achieve a stylish, functional and safe solution is always worth it.

Start with the drawings

Start planning your bathroom by drawing the top view of the usable space on graph or similar squared paper, for example. Mark the locations of doors, windows, pipes and plumbing on the drawing. The location of the shower and toilet are mostly determined by the plumbing, but positioning the cabinets allows you more freedom.

If you are really sure of what kind of mood you would like to create in your bathroom, collect magazine clippings of the solutions you like. Examine the photos carefully and analyse what exactly you like about these. Is it the colour of walls or floor, lighting, cabinet material, or the bold shape of the bath or shower cubicle?

A small room can be functional as well

The smaller the bathroom, the more important a proper plan is. The right choices will make a small room function well. For example, take a look at the washbasin on page 78. There is enough space for a smaller washing machine which can be placed under the basin. If having a bathtub is your dream, you will save space by adding a shower enclosure to your bath. This way you will not need a separate shower cubicle or corner and your dream will come true even in a small bathroom.

Ask for professional help

Building or redecorating a bathroom requires knowledge and skills. Specialists know how to create moisture barriers and the inclines needed. Electrical installations by law require the involvement of a qualified electrician.

THIS IS THE WAY TO TAKE GOOD CARE OF YOUR BATHROOM

A beautiful and well-functioning bathroom is an investment which makes your life more comfortable and increases the value of your dwelling. The following guidelines help you take good care of your bathroom.

Bathroom furniture

Our furniture frames and fronts are made of water-resistant material. Despite this, the furniture cannot withstand long-term exposure to water and so items of furniture should be placed a sufficient distance away from the shower. After use any water splashed on furniture should be wiped away with a dry rag.

Showers

After use, wipe away water from shower enclosures as it makes the servicing of the shower easier. Use a non-abrasive when cleaning the shower. If a shower basin is scratched or has lost its colour, it can be

restored by polishing and waxing. Deep scratches can be sanded out.

Our shower cubicle is equipped with castors which enable it to be moved easily for the time of floor cleaning. Shower trays come with a removable front panel which makes cleaning even easier.

Toilets and sinks

Our ceramic products have been designed with special emphasis on their cleanability. The surfaces of our porcelain sinks and toilet seats are easy to clean with mild detergent. All IDO Seven D toilet seats and sinks feature a new, smoother glaze, which reduces dirt accumulating on the surface and helps maintain the cleanliness of your bathroom.

Baths

A bath must be cleaned using only non-abrasive substances and a soft rag so that the bath surface will not be damaged. Our sanitary acrylic baths can be sanded and polished when a scratch has appeared.

What to do if the product gets damaged?

Keep the receipt. The porcelain products made in Finland have a 10-year warranty and the fitted toilet water tank flushing mechanisms come with a 5-year warranty. All our products have a warranty period of at least 2 years. The warranty covers both design faults and defective materials.

Where can I get spare parts?

If you use our products correctly and service them regularly, they will bring you joy for many years to come! A wide variety of spare parts is available for all our products. Further information on spare parts can be found in the mounting and service instructions which are included with each product set.

The phosphate-free IDO Showerclean is an easy-to-use general cleaning detergent for showers and the entire bathroom.

IDO BATHROOM FURNITURE

Cabinets and their colours usually form the most visible part of bathroom interior. If you need a bit of cheering up, you can go for colourful or glossy doors. If you want to tone it down, have a look at our wood-coloured door options.

Remember to place cabinets correctly

While colours and materials are a matter of taste, cabinet placement is all about functionality. Our cabinet cases and front parts are made of humidity-resistant material

Made in*
Finland

featuring various humidity-resistant coatings, making the cabinets easy to keep clean. All wooden furniture is protected with durable acid-curing lacquer.

Although our furniture is highly humidity-resistant, it should not be exposed to extremely humid conditions for long periods of time. Therefore, it is always recommendable to install the furniture at an appropriate distance from the shower or bathtub. If any surfaces of the furniture get wet, they should be dried up with a cloth.

IDO cabinets are delivered assembled

Our cabinets are usually delivered pre-assembled, making their installation quick and easy. The only exception is the Smart

range, which is delivered in parts and is easy to take home even in a smaller car.

The furniture is installed on or against walls, and supporting legs are available as accessories.

Set the mood with lights

IDO mirrors are equipped with fluorescent, halogen or LED lights. Fluorescent light imitates daylight. Therefore, when you look in the mirror, you should see yourself in correct lighting. Halogen light creates a warm atmosphere in the bathroom, while LED lights provide bright lighting with minimal energy consumption.

*] The IDO Smart range is made in Sweden.

For more information,
please visit

www.ido.fi

IDO SEVEN D range provides clean lines and refreshing simplicity to your bathroom. The bathroom furniture is 400 mm deep with white and black ash colour options.

THE IDO TREND range brings together pure Nordic design and Italian minimalism. The bathroom furniture is 500 mm deep with white, grey, black ash and elm colour options.

PAGES 22-25

IDO Trend

PAGES 26-31

Live wood

The beauty of wood lies in the way it lives. The appearance of wood varies, for example, according to its habitat and age. This means that the colour and patterns of wooden furniture may vary between the images of the catalogue and the furniture showcased in shops or delivered to you. With age, the colour of the wood may become deeper and darker.

For material options, see page 45.

IDO Select

PAGES 32-39

IDO SMART is a self-assembly furniture line that is cost-effective and suitable for both smaller and somewhat larger bathrooms. The items come in white, walnut and oak. The depth of each item is 320 mm.

IDO Renova

PAGES 40-41

IDO RENOVA is a compact line for smaller bathrooms. The depth of items is 230-320 mm and they come in white, dark grey and and oak.

IDO SMART is delivered in parts and therefore easy to take home even in a smaller car. These cost effective furniture are ideal not only for small but a little wider bathrooms as well. You have three colour options to choose from: white, nut and oak.

IDO Seven D line is meant for everyday use. The furniture is 400 mm in depth, which makes the straight-edged vanity tops and cabinets suitable for small Finnish bathrooms too.

IDO Seven D product line includes, as well as furniture, many stylish washbasins that can be found on page

77

The Milk glass shelf adds extra storage space and lightness to the bathroom.

The base cabinet provides additional storage space. Both drawers pull out completely. Practical inner compartments in the upper drawers are standard and can also be purchased separately for the lower drawer.

No handles are needed here. The edges of the handleless door and the opened drawer have been bevelled in order to make room for fingers and provide a better grip.

The efficient matt aluminium fluorescent lamp of the mirror cabinet provides light for the washbasin and also reflects light into the ceiling, thus creating a pleasant atmosphere. The lamp imitates daylight and makes applying make-up easier. The frame of the mirror cabinet is from matching aluminium and contains an electric socket too. The cabinet is available in the same width as the IDO Seven D line base cabinets (800, 1,000 and 1,200mm).

IDO Seven D

The base cabinet and corner mirror mounted to the wall are true wonder products! The corner mirror also has extra milk glass shelves that are attached to the wall.

Out of sight but still at hand. IDO cabinets and drawers help you find a place for both important items as well as for just decorative elements.

IDO Trend acts according to its name and carefully follows current trends. The new material this year is elm, which combines the best qualities of real wood: it is hard, durable and has a wonderful wood pattern.

Northern purity and Italian minimalism perfectly characterize IDO Trend line items, which are suitable for somewhat bigger bathrooms. The style represents the freshest of Scandinavian trends.

IDO Trend line items
come in white, dark
grey, elm and black ash.

IDO Trend line is now even more elegant because the doors and drawers of different items are handleless and can be opened and closed by merely pushing.

THE PUSH OPEN mechanism is an excellent example of the IDO Smart innovations that make your everyday life easier! Find out more on pages 14 and 15.

Everything is at hand in the drawer under the washbasin. Successful design has made it possible to use this space as well.

IDO Trend items can be mounted on the wall, and do not require additional leg sets. The result is airy and light and as it makes wiping the floor easier, it will definitely be the favorite of those who do the cleaning.

Sharing the bathroom in the evenings or brushing your teeth together in the morning? The IDO Trend base cabinet and IDO Wave vanity top washbasin together create a stylish set for two users which is wonderfully complemented by our new mirror.

IDO Select product dimensions

Designed by Fredrik Wallner

The items of IDO Select line are divided into three categories based on their depth. IDO Select Small, meant for smaller bathrooms, is only 320 mm deep. Medium comes in 370 mm depth. If there is more space, it pays to choose IDO Select Large with 490 mm in depth. The width is the same for all items of furniture: 600, 900 and 1,200 mm.

IDO Select Small

Dark grey brings out the aluminium shade of the handles and high cabinet door. The high cabinet comes in two versions: one with milk glass shelves, LED lights and built-in socket or a simpler model without the socket and lighting. Lower side cabinet has a smoothly closing door and extractable drawer.

IDO SELECT SMALL is, as the name suggests, a solution to the space problem in the small bathrooms. Although the furniture depth is only 320 mm, the cabinets offer plenty of storage space, showing that small can also be practical. Choose from a variety of drawer fronts, doors and handles and create a set especially suitable for your bathroom. You can complement the furniture from IDO Select Small line with a vanity top washbasin that is available in 600, 900 and 1,200 mm widths.

IDO Smart

The IDO Smart range represents quality, functionality-oriented design. The self-assembled, and therefore cost-efficient, furniture range offers guaranteed IDO quality. Available in oak and nut with 900 and 1,200 mm widths.

IDO Classic

Simple is beautiful. The simplistic design of the IDO Classic range brings style and functionality to both bigger and smaller bathrooms.

IDO Mirrors

The mirror is an important part of bathroom decor. It creates a sense of space while also hiding containers, shavers and jars. Mirror lights provide lighting in the right spots. In other words, the mirror brings the bathroom design together.

IDO's wide product range provides the perfect solution for every type of bathroom. You can just pick the style and mirror size to match the location.

Choose your preferred IDO plane mirror. Equipped with a fluorescent light, the plane mirror provides plenty of lighting. Height 640 mm with width options of 600, 800, 900, 1,000 and 1,200 mm.

With its stylish LED light and reflective paneling, the IDO flat mirror LED suits all bathroom interiors. Height 900 mm with width options of 560, 600, 800, 900, 1,000 and 1,200 mm.

The IDO mirror cabinet includes an electrical outlet, fluorescent lights, two adjustable glass shelves and an extra mirror on the inside of the door. Height 600 mm, width 500 mm.

Halogen lights provide warm and comfortable lighting.

The daylight lamp of the mirror cabinet is perfect for doing makeup.

The LED light provides a bright atmosphere for the bathroom.

The IDO mirror cabinet includes two glass shelves, a 230 V electrical outlet, a fluorescent light and additional LED lights providing lighting for the washbasin. Height 695 with width options of 594, 891 and 1,188 mm.

The IDO Plus mirror cabinet features double-sided mirror doors, two adjustable shelves, a 230 V rotating electrical outlet and LED lights. Width 560 mm.

Not only does the integrated LED light provide beautiful lighting for the washbasin, it is also energy-efficient with a long life cycle.

IDO Select and Classic handles

IDO handles provide an abundance of options. This is a good thing because the handle is an essential part of the furniture. It is very important to have a handle that feels good to use. You can visit a retailer and try out various handles. Close your eyes and think whether you prefer the softness of round shapes or the sturdiness of angular shapes.

IDO Seven D cabinet product description

Black ash is made of stained and semi-glossy lacquered, humidity-resistant chipboard (P5) with authentic veneer coating. White cabinets are made of MDF (P3) with semi-matte paint coating.

The black ash drawer panel of the rounded lower cabinet 97910 is made of mould-pressed ash veneer, which has been stained and treated with semi-matte lacquer. The white drawer panel is made of mould-pressed birch veneer with semi-matte lacquer colour finish.

IDO SHOWERS

Shower brings luxury to your everyday life. A shower wakes you up in the morning and washes your worries away in the evening. Consider carefully the choice of a shower for your home to ensure enjoyable showers for now and years to come.

Follow the good old rule of thumb: choose as large a shower as fits into your bathroom. A metre on all sides is luxurious, 80 x 80 cm is perfectly plenty, and 70x70 cm you should go in case the space is really tight.

537 solutions

We offer dozens of showers of various sizes and shapes, and when you add to these our diverse range of glass, you can choose among 537 solutions! Not only the number of solutions, but also the quality is great. Our 40-year-long experience can be seen and felt in the details as well as comfortable usage. IDO showers are durable, safe and easy to clean, and these qualities you will still appreciate for many years to come.

A SHOWER CUBICLE

includes an enclosure and a tray. Water will splash neither on the walls nor the floor, and so slipping on the floor becomes less likely. The pipes have been integrated in the structure of the shower, which looks neat and beautiful. Thanks to the adjustment possibilities, it is easy to install the shower cabin on an inclined floor.

IDO SHOWERAMA

SHOWER DOORS are an excellent choice for a large or a small bathroom. Our range of products even includes swinging or sliding doors with fixed profiles.

A SHOWER ENCLOSURE

is a fantastic solution for a small bathroom. Swinging and fixed models are available. A fixed shower enclosure can be equipped with a floor profile or at least a curtain rail.

A variety of **SHOWER ENCLOSURES** are available. The model with a floor profile is more watertight. If you are not using the shower, the doors can be folded away.

A **BATH DOOR** is a stylish alternative for the shower curtain. It is easy to step into the bathtub as the door opens inward and outward.

Colours into the bathroom! Choose a black, white or red shower screen and floor profile. Choose accessories and a toilet seat of the same colour to make the whole set complementary.

Shower cubicle

IDO SHOWERAMA 8-5

Designer
Dan Sevaldson / Hareide Design

You will find the perfect model for any bathroom among the variety of IDO Showerama 8-5 shower cubicles. Four different sizes and dozens of glass options are available. The shape of the tray saves space and IDO Showerama 8-5 shower enclosure is suitable for smaller bathrooms as well.

The standard model features a shower column with a black floor profile. For the same price, you can select width and glass type: clear, misty, smoked or Dandelion II patterned glass.

IDO Showerama 8-5 is a safe choice as evidenced by the SINTEF EN15200 certification (Shower cabinets with additional features).

SINTEF is the largest independent research organisation in Scandinavia. SINTEF performs over 7,000 research projects for 2,300 clients every year.

NB! If you are looking for a shower, for example, for your summer house, take a look at IDO Showerama 8-5 – the lower shower cubicle model. Its maximum height is just 2,120 mm, and the dimensions are 900 x 900 mm.

Height
2220–2250 mm
(approximately 2240 mm with a steam room)

The fixed top shower comes with a stylish spray head. A truly large spray head will remind you of standing in refreshing rain.

Enjoy the novel morning shower and the evening wash. IDO Showerama 8-5 shower cubicle is full of carefully thought out details.

The hand shower-head, of contemporary design, can easily be adjusted to the right height. A handy faucet enables you to grip it well even with wet fingers. An Oras thermostat faucet is at the heart of the shower.

Shower trays come in four sizes:
 1000 x 1000 mm
 900 x 900 mm
 900 x 800 mm
 800 x 900 mm

IDO Showerama 8-5

The IDO Showerama 8-5 range provides suitable shower cabinets for your bathroom. For more information, please visit our website at www.idoshowerama.fi.

The stylish door handle features the same design as the shower tap handles, providing solid grip even with wet hands. The quality handle stays clean year in and year out.

THE TAP HANDLES are designed to be easy to handle with wet hands and soapy fingers. The heart of the shower is the Oras thermostat water mixer. The IDO Showerama 8-5 shower cabinets are delivered with two practical shelves made of clear plexiglass.

The large drain is both stylish and functional. Water is efficiently removed, and the drain is easy to keep clean.

Thanks to the new basin design, the door frame is 500 mm wide. The door slides effortlessly and shuts tightly. Functionality is ensured with a magnet fitting.

A sturdy foot and wheels to make moving the shower cabinet easier are located below the basin. This enables the shower cabinet to be moved, for example, during cleaning.

Both the wheels and the supporting leg are adjustable, enabling the shower cabinet to be installed straight even when the floor is tilted.

The IDO Showerama 8-5 is a carefully designed product. A fine example of this is the footing profile, providing a nice finishing touch to the bottom of the basin. If necessary, the profile is easy to detach.

Accessories

IDO SHOWERAMA 8-5 SHOWER CABIN

Add the finishing touch to your shower cabin with the right accessories. We are constantly expanding our range of accessories: the most up-to-date list can be found on our homepage - www.idobathroom.com

The beautiful and practical decorative panel is equipped with a towel hook and adds the final touch to the whole set.

The steam room will not let the steam spread outside. The steam room rises to 113 mm above the top profile, maximum height is approx. 2240 mm.

Complement your showers with some crystal clear luxury. The durable but stylish seat is made of transparent plexiglas.

Basic model with a white shower panel, white rail and black floor profile.

IDO Showerama 8-5

The shower cabin includes a man-made marble basin, Oras thermostat faucet, a shower set, top shower, fixed shelves and white aluminium profiles. Height 2,220 mm. Adjustment margin +30 mm.

Here you will find some of the product numbers for our bestselling models, selected based on the type of glass. Choose the one that best fits your needs or make a complete set out of the parts whose price list can be found at the bottom of the page.

This tailor-made shower cabin consists of the following parts:

- Red pillar
- White tray
- Red plinth
- Transparent frontal glass
- Transparent rear glass

Additional information
is available at
www.idobathroom.com

The IDO steam generator turns your shower into a steam bath. The device is installed behind the shower panel: only the round steam head can be seen in the bottom part of the shower panel and steam button fitted near the faucet. The steam room to go with the steam generator can be seen on the next page.

IDO Showerama 8-5 is a safe choice as evidenced by the SINTEF EN15200 certification (Shower cabinets with additional features).

We wish our showers to be as stylish as possible, but we consider function and safety to be as important as style. The shower enclosure should protect the bathroom from splattered water. In addition, the shower cubicle must be easy to install and clean. So we choose our materials carefully and do our best to polish even the tiniest product details.

Shower cubicle

IDO SHOWERAMA 8-02

The IDO Showerama 8-02 shower cubicle comes with straight doors which rise 8 mm when opened. The model does not include a plinth profile, but can be mounted on a floor with a sufficient fall. The doors can be easily folded away when the shower is not in use. The bottom of the doors has a long seal and in between is a magnetic seal which enables the doors to close tightly. IDO Showerama 8-02 shower cabin is suitable for bathrooms with surface plumbing.

Dimensions and glass options are shown on page 69.

Height
1950 mm

Shower cubicle

IDO SHOWERAMA 8-4

The IDO Showerama 8-4 shower cubicle's beautifully curved doors rise 8 mm when opened. The model comes without a plinth profile. The shower cabin can be mounted on an inclined floor. The bottom edge has a long seal which ensures that water flows away from the shower. The doors turn inward and outward and close tightly as they are equipped with a magnetic seal. The IDO Showerama 8-4 shower cabin is best for bathrooms with surface plumbing.

Dimensions and glass options are shown on page 69.

Height
1950 mm

Choose from four different glass types: clear glass, smoked glass, frozen glass and Dandelion II.

Shower cubicle

IDO SHOWERAMA 7-3

Designer Einar Hareide

The IDO Showerama 7-3 shower cubicle comes with an adjustable floor profile which makes the shower truly durable and watertight. The shape of the shower saves space and several sizes are available. You can choose between models that have equal sides or sides of different size. IDO Showerama 7-3 shower cabin is also suitable for bathrooms with surface plumbing.

Height
1950 mm

Dimensions and glass options are shown on page 69.

Inform us of the shower dimensions as follows

Example 1
Dimension A = 800
Dimension B = 900
Required space:
800 x 900 mm

Example 2
Dimension A = 900
Dimension B = 800
Required space:
900 x 800 mm

Always give us measurement A first.

Shower door

IDO SHOWERAMA 8-0

The IDO Showerama 8-0 shower door opens as the user wishes - inward or outward. The bottom edge is equipped with a long seal which reduces the amount of water that escapes the shower. Several widths are available: from 700 mm to 1200 mm. In case of dimensions of 700-900 mm, there is one door and wider solutions have two doors. The IDO Showerama 8-01 shower door is suitable for bathrooms with a steep incline and surface plumbing.

Height 1950 mm
Adjustment margin -20/+20 mm.

Model 8-0 with one door, dimensions 700-900 mm
Model with two doors, dimensions 950-1200 mm.

Dimensions and glass options are shown on page 69.

Shower sliding doors

IDO SHOWERAMA 7-1

The IDO Showerama 7-1 sliding door is a stylish and watertight solution for a shower with a floor profile. It comes in different widths: 1200 – 1750 mm. The doors are equipped with a practical brake function, and they move in a way that prevents water from escaping from the shower. Wall profiles have enough space for pipes.

Height
1950 mm

Dimensions and glass options are shown on page 69.

Fixed shower wall

IDO SHOWERAMA 2-0

IDO Showerama 2-0 shower enclosure is fixed to the profile fitted between the floor and ceiling. The maximum fitting length of the profile is 3000 mm. You can add an adjustable plinth or a curtain rail if you wish.

Height
1950 mm

Dimensions and options of glasses are shown on page 69.

Shower wall

IDO SHOWERAMA 8-41

The IDO Showerama 8-41 is a stylish curved shower enclosure which can be folded away when the shower is not in use. The enclosure can be adjusted to open right or left, so the enclosure can be fixed to the wall on the left or right. The bottom edge of the enclosure has a long seal which prevents water from flowing out of the shower.

Height
1950 mm

Dimensions and glass options are shown on page 69.

Shower wall

IDO SHOWERAMA 8-01

The IDO Showerama 8-01 is a straight shower enclosure of clean design. The enclosure is equipped with hinges which enable you to fold it away when the shower is not in use. The door can be made right- or left-handed, so the enclosure can be fixed to the left or right wall. The bottom edge of the enclosure has a long seal which prevents water from flowing out of the shower.

Height
1950 mm

Dimensions and glass options are shown on page 69.

Bath wall

IDO SHOWERAMA 8-40

The IDO Showerama 8-40 is practical and beautiful and provides protection against the splashing of water as an alternative to wet shower curtains. The hinged enclosure opens in both directions. It is straight, made of glass, and its top edge is slightly rounded.

Height
1400 mm

Dimensions and glass options are shown on page 69.

IDO showers are durable, safe and easy to clean, which you will continue to appreciate in the years to come.

IDO Showerclean
phosphate-free
IDO Showerclean
is an environ-
mentally
friendly
choice.

IDO Showerclean

IDO Showerclean is an easy-to-use general cleaning detergent for showers and the entire bathroom, eliminating stains and calcification.

The design of the IDO Showerama showers makes them particularly easy to clean with Showerclean. The glasses are textured only on the outside, making the smooth inner surface easy to clean. The shower doors and cabinets have been designed with a minimum amount of screw holes and other dirt-gathering holes. The cabinets are completely silicone-free, reducing bacteria accumulation. The wheels of the Showerama shower cabinets enable them to be moved during cleaning, making them easy to clean thoroughly with Showerclean. This also allows you to clean the floor below the shower cabinet.

IDO WASHBASINS

Washbasins are subjected to a lot of wear and tear during their life cycle. They serve as the cleaning place for dirty hands and little laundry, and some of the detergents can be quite harsh on the surfaces.

Washbasins have to endure rough handling. The washbasin mounting should also be durable. The structure of your bathroom wall determines whether screws are enough or if brackets are necessary.

IDO washbasins are glazed porcelain. The material is easy to keep clean and bright year in and year out. Porcelain is a natural material, which sometimes results in slight variations in the dimensions of the washbasins (2%). Please be mindful of this when measuring the location for your new washbasin.

The location of the washbasin is usually dictated by the water and sewage piping. Although the piping can be rerouted, the easiest way is usually to install the washbasin to fit the location of the piping. The recommended installation height for washbasins is 800–900 mm. Generally, basins are installed so that the top is approx. 850 mm above floor level.

IDO washbasins are divided into three categories: traditional washbasins, vanity tops

as well as inset and washbasins. Our selection has the right washbasin for lay-on any space and location.

Smooth glazing makes cleaning easier

IDO Seven D washbasins feature a new, smoother glaze. The slippery surface prevents dirt from sticking to it, making cleaning effortlessly easy.

VANITY TOPS feature a countertop around the basin for placing objects. The basin also serves as a top for the cabinet located under it.

LAY-ON BASINS are installed on a countertop similar to a washbowl, while **INSET WASHBASINS** are installed in a hole in the countertop.

TRADITIONAL WASHBASINS are installed directly on the wall. All IDO basins are made of authentic sanitary porcelain.

Inset washbasins and vanity tops

Below, above or on the surface? Inset washbasins are fitted into an opening prepared in the level surface from above or below. NB! Some of the surface-mounted washbasins can be fitted directly to the wall using brackets.

Vanity tops

A vanity top brings joy to the user as well as the cleaner as its joint-free and smooth surface is easy to clean. If you wish, several vanity tops may be mounted directly on the wall with brackets but without a base cabinet.

Are you longing for some colour in your life? IDO Select accessories set has many colours, and you can choose between 2000 shades.

IDO Washbasin accessories

In addition to being elegant-looking, a washbasin must also be durable. Using the right brackets, a washbasin can be mounted on any wall.

Many washbasin brackets allow the addition of a practical towel rack. More information available at www.idobathroom.com

IDO Function

The IDO Function series makes everyday life a little easier; a good example is the basin shown in this photograph, the height of which can be adjusted to suit you.

Curved and functional

Washbasin 11107 and an adjustable wall-mounting 61056 are first and foremost meant for a physically challenged user. The height can be changed, if necessary.

Washbasin for physically challenged user 11107

B 600, D 580

Fixing screws are included in the set. Available also without an overflow opening and/or tap opening.

Adjustable wall-mounting 61056

Flexible inflow and drainage system.

A shining example of the IDO innovations that make your everyday life easier!

Beautiful, curved and functional.

The special feature of Function washbasin 11178 is the inward curving shape, which allows you to support yourself on the basin very comfortably while washing or applying make-up.

Funktio washbasin 11178

B 600, D 470

Screw fastening, fixing screws (61004) are included in the set.

Water trap

Easy to clean. The water trap minimises the need for harsh cleaning materials that may damage the pipes. Can be used as a plug.

Water trap 65011

Tone: Chromed/cork

Water trap plug, spare part 65015

Tone: Chromed/white

When space is tight

Do you have a small bathroom and wish to fit a washing machine in it? You can nicely fit a small front loading machine. The washbasin is ideal for a user in wheelchair as the water trap will not be in their way. Item number 11166.

Washing machine basin 11166

B 600, D 590

Fastening for brackets, brackets (61018) need to be ordered separately. A set of plumbing couplings and a grid with the necessary parts are included in the set.

Discharge pipe opening

The IDO Seven D 13 toilet seat is also available with laundry machine discharge pipe connection. This is a more practical and safe solution than a discharge pipe hung on the edge of the washbasin in locations without a dedicated discharge connection for the laundry machine.

IDO Seven D with a washbasin or laundry machine discharge pipe hole.

Nordic Quality label is a reliable warranty of the quality of IDO products.

Fresh WC is a built-in freshener which automatically measures the right amount of freshener into the flushing water.

A Fresh WC freshening stick is placed directly into the flushing water, in the water tank. The WC is refreshed from top to bottom with every flush. The solution is eco-friendly and safe for families with children.

IDO WCs

A wc is a product you buy for long-term use. It is used several times a day and therefore it must function well, be stylish and durable. If you are replacing your old wc, the plumbing determines your choice. A model with a wide foot is the easiest to mount and it hides the screw holes. If you are building a new WC, the range of options is wider.

Wcs come in a variety of sizes and heights. High models are especially suitable for very tall or elderly people. Sufficient space should be ensured on both sides of the wc as small rooms can be uncomfortable. A wc is usually at least 80 cm in width.

Accessories

If needed, the wc can be equipped with arm supports or automatic flushing. The availability of accessories varies from model to model. More information can be found on page 98.

Our wcs have been awarded the Nordic Quality label. It guarantees that IDO wcs are of excellent quality, and assures you of the fast and unfailing supply of parts even 10 years after the production of a particular model has finished. All our wcs come with the CE label.

IDO saves water and effort

IDO design guarantees that wcs function with very little water. Ordinary flushing uses up only 4 litres of water and the smaller flush of the dual system only 2,5 litres. The amount of flushing water can be adjusted.

The Siflon finish of the wc makes cleaning easy. Siflon works like car wax: flushing water removes dirt and forms drops. IDO Siflon-finish models can be recognised by their label.

Tones of colour and a personal touch can be added by choosing a cover and flushing button to your liking to improve product appearance.

A **WALL-MOUNTED WC** is stylish and safe. Its frame and water tank are concealed behind the wall or its covering material. When the wc is mounted on the wall, the floor remains free so it is easier to clean the area.

The wall-mounted wc is a good choice even when the room is equipped with floor heating as you do not need to make any additional holes in the floor. The flushing mechanism is right behind the flush button and easy to maintain if needed.

WCs WITH FLOOR-MOUNTING come in several contemporary styles. An IDO stylish case contains some carefully created details, for example, a very reliable flush mechanism, an automatic Fresh wc-freshener and a water tank with a double wall which prevents condensation water from collecting on the external surface of the tank.

The design is stylish and functions well and so our wcs have very few joints where dirt can accumulate. The smooth surface can be easily kept clean from year to year.

Further information is
available at
www.idobathroom.com

Floor- mounted WCS

Wcs with floor-mounting come in many varieties, ranging from the streamlined minimalist design IDO Seven D series to the sculptural Pozzi-Ginori Join WC. Our newer models are equipped with a dual flushing mechanism which reduces the consumption of water considerably.

The new, smoother glaze of the IDO Seven D WC seat reaches beyond visible areas.

WALL-MOUNTED WC FRAMES

Our range of models includes two frames, a short and a tall one. The dimensions of both frames are in accordance with current construction standards. It is easy to mount these in any bathroom due to their ability to adjust widely and clever design.

The wall-mounted wc is easy to install with IDO seats and mounting brackets. We recommend the tall mounting bracket as a primary choice.

IDO 9137200001

Now also the wall-mounted wc can be easily freshened

Fresh WC freshener is fully-automated. When the stick is used up, it can be replaced through the flush button. The wc functions normally even without the stick.

Mechanical flush buttons (69083, -84, -87, -81) are equipped with the Fresh WC -freshener function. Pneumatic flush buttons (69082) can be connected to the Fresh WC function with a separate filling button.

IDO Seven D innovations helping your daily routines

NEW, SMOOTHER GLAZE MAKES CLEANING EASIER

All IDO Seven D wcs feature a new, smoother glaze, preventing dirt from sticking to the seat surface and making it easier to keep clean.

SMOOTHER CLEANING

IDO Seven Quick Release & Slow Close seat covers are easy to remove during cleaning, and they also come down softly without a clang when lowered.

HYGIENE

The optional IDO Seven D Sensor provides touch-free flushing – all you need to do is pass your hand over the sensor. Large and small flushes are performed with a slow motion and a quick swipe, respectively.

FRESH WC FUNCTION

automatically adds refresher for every flush.

DESIGNED AND MADE IN FINLAND

Functionality and spare part availability guaranteed. IDO Seven D is an ecological, water-saving choice.

WATER TANK FEATURES A DUAL STRUCTURE

The outer surface does not become moist during hot summer days, while inner cistern reduces water damage hazard.

OUR EXTENSIVE

product range covers all needs from renovation to construction work. The package can be completed with matching wash basins, furniture and baths.

CAREFULLY DESIGNED

Easy-to-clean everyday design.

CAN ALSO BE INSTALLED BY GLUING

Do not damage the water insulation of the floor with unnecessary screw holes.

EASY TO INSTALL,

regardless of the location of the drain and water connection.

Slow Close hinges prevent the cover from clanging against the porcelain.

Quick Release & Slow Close hinges

IDO BATHS

If a relaxing bath is what you dream about, then this is the right moment to make your dream come true. Our wide range will offer a suitable bath for every bathroom. The smallest model takes up less than 1 m² (1400 x 700 mm) and the biggest ones are big enough for two people to take a bath together.

A built-in bath makes the bathroom look elegant but takes more space. If you choose a built-in model, remember that the bath also needs a maintenance hatch for cleaning.

Choose the right model

When choosing a bath, besides size you have to also consider how the bath will be used. If the bath will be used by the whole family, pay more attention to the fact that the material should be durable and easy to clean. An enamel-coated steel bath is a safe choice that will stand also intensive use. If you yearn for long, peaceful moments in the bath and wish to bring some luxury into your life, choose a bath that is made of sanitary acrylic. The surface of this material is soft and warm and it is easy to polish off the occasional surface scratches that appear over time.

Choose the right position

The warm water in the bath increases the humidity of bathroom air, so it is important to have sufficient ventilation in the bathroom.

The walls and floor surrounding the bath have to be covered with efficient waterproof sealant so that you can really relax and enjoy your bathing moments.

A **CORNER BATH** requires a bit more space but also offers a more pleasant time in the bath. Two adults can enjoy relaxing moments in this bathtub but it is also suitable for the fun water games of children taking a bath together.

FREE-STANDING OR BUILT-IN BATH? Our catalogue offers the right choice for people looking for a traditional bath as well as for those in search of a luxurious bathtub with a bold design.

An **ASYMMETRICAL BATH** can fit into small bathrooms too because the smaller end is only 500 mm wide. Based on how much free space there is, you can choose a model narrowing to the right or to the left.

Additional information

www.idobathroom.com

Rectangular bath IDO SEVEN D IMAGE

Designed by Adolf Babel

BATHING IS AN EVERYDAY LUXURY for both children and adults. "A shower cleanses the body, but a bath cleanses the mind as well," says Adolf Babel, the designer, about bath magic. He has designed the IDO Seven D Image bath model.

IDO Seven D Image 1600

9530201001
Support frame 9530601001
Front panel 9531101001
Side panel 9531401001
Wooden bath board 9531777001

The IDO Seven D Image bathtub introduces a completely new solution to the world of bathtubs. The overflow system of the bath is on the front edge and the bath can be filled up to the very top. Bathing depth is increased in this way by 450mm, meaning more water and more enjoyment in the bath!

The front edge of the bathtub is lower than other edges which makes it easier to step into the bath and, when necessary, to get support from the water channel in the front edge. The other, higher edges offer good support for the bather and protect the wall against splashes. It is also possible to get a bath board as an accessory that can be used as an extra surface and a seat.

The innovative design of the bathtubs has been created by the internationally known and recognized designer Adolf Babel.

"The aim of the design should always be functionality, and not only appearance," he verbalizes his credo. IDO Seven D Image is the proof that this claim holds water.

Bath boards that come as accessories are made of bended wood and come in black ash. Maintenance of the boards is easy, it is enough if they are simply oiled or waxed.

THE STYLE OF THE BATHROOM is easy to change with small details. A black toilet seat cover would suit perfectly with this black and white design. If you want a wider range of colours, see our choice of toilet seat covers on **PAGE 88**.

Rectangular bath

IDO SEVEN D 1400 / 1500 / 1600 / 1700

The innovative design of **IDO SEVEN D** rectangular bathtubs saves water but does not reduce the comfort. It is a pure pleasure to fill and use a bath that is narrower at one end.

The **IDO SEVEN D** line bathtubs have received new models; the first one of these to be introduced is the traditional and stylish IDO Seven D 1500 rectangular bathtub. This white, sanitary acrylic bath with a support frame is made in three sizes – and the associated models 1400 and 1600 diversify the product range with models suitable for both somewhat smaller and more spacious bathrooms.

IDO Seven D 1500 rectangular bathtub. Support frame, front and side panels included in the set. Weight 27.0 kg, volume 185 litres and depth 420 mm. Faucet can be attached directly to the bathtub.

Asymmetrical bathtub

IDO SEVEN D 1500 / 1600

An asymmetrical bath creates more free space in smaller bathrooms. It is possible to choose between a model with straight or curved sides.

A bathtub with **STYLISHLY CURVED SIDES** suits smaller bathrooms too. This model is only 1500 mm long and the side is only 500 mm wide. A pleasant bathing session is guaranteed despite its small dimensions because the volume of the bath is 210 litres. It is possible to choose between two models, right or left-handed. The faucet can be attached directly to the bathtub.

IDO Continental

TERRA

The elegant lines of our **EUROPEAN BATHTUBS** create a luxurious atmosphere in the bathroom. Streamlined bathtubs are stylish and offer the best bathing experience. The baths are made of warm and pleasantly coloured sanitary acrylic. Support legs and overflow system included in the price.
